**BEFORE YOU START THE ASSEMBLY, PLEASE READ THE FOLLOWING TIPS AND WARNINGS.**

- Do not discard this manual or any of the packaging material until the unit has been completely assembled.

- If during assembly you find an issue or need clarification, please contact our Customer Service for assistance. Please refer to the last pages on this manual.

- On each step read the instructions thoroughly and analyze the illustrations before proceeding to do the assembly.
- Follow the instructions step by step and do not skip any unless our Customer Service advises it is OK to do so.

- Make sure you understand which hardware will be used on each step. Using the wrong size of screw, bolt or pin might strip the threads or cause damage to the part in which it is being used.

- To avoid misalignments, always leave the screws loose and tighten them until all pieces are positioned correctly.

- Do not overtighten or force the screws as they might break, strip, damage the threads of the holes or get stuck inside the part.

- If the hole seems too small for the screw, make sure you are using the correct size of screw and/or that you are installing it in the correct hole.

- Sometimes on the panels the laminate or material might be covering the hole partially or entirely. If there is no visible hole or it seems too small, pass and press the tip of your finger over the area where the hole should be located to feel its indentation, and once found, carefully pierce the laminate to uncover the hole underneath.
