

Masterpiece Molding

Masterpiece Molding is a special innovative, exclusive AFD Home product that enables homeowners to apply beautifully finished molding right out of the box

Prior to Masterpiece Molding, a ceiling design this advanced would've required an elaborate installation project, carpenters, finishers, and possibly even artists.

Now you can easily install a finished product by yourself in minutes!

Unfading Elegance

We hand cast every unique ceiling medallion and molding design in lightweight polystyrene, a durable material that won't shrink, split, or crack with the passage of time, even as it evokes the antique style of times gone by.

We use the same technology from our crown molding to craft our extremely detailed ceiling medallions.

Our ceiling medallions, crown molding, wall decor, and chair rail come in multiple gorgeous finishes, including silver on black, gray with silver, gold on french white, gold on wood tone, and many more!

Timeless creation

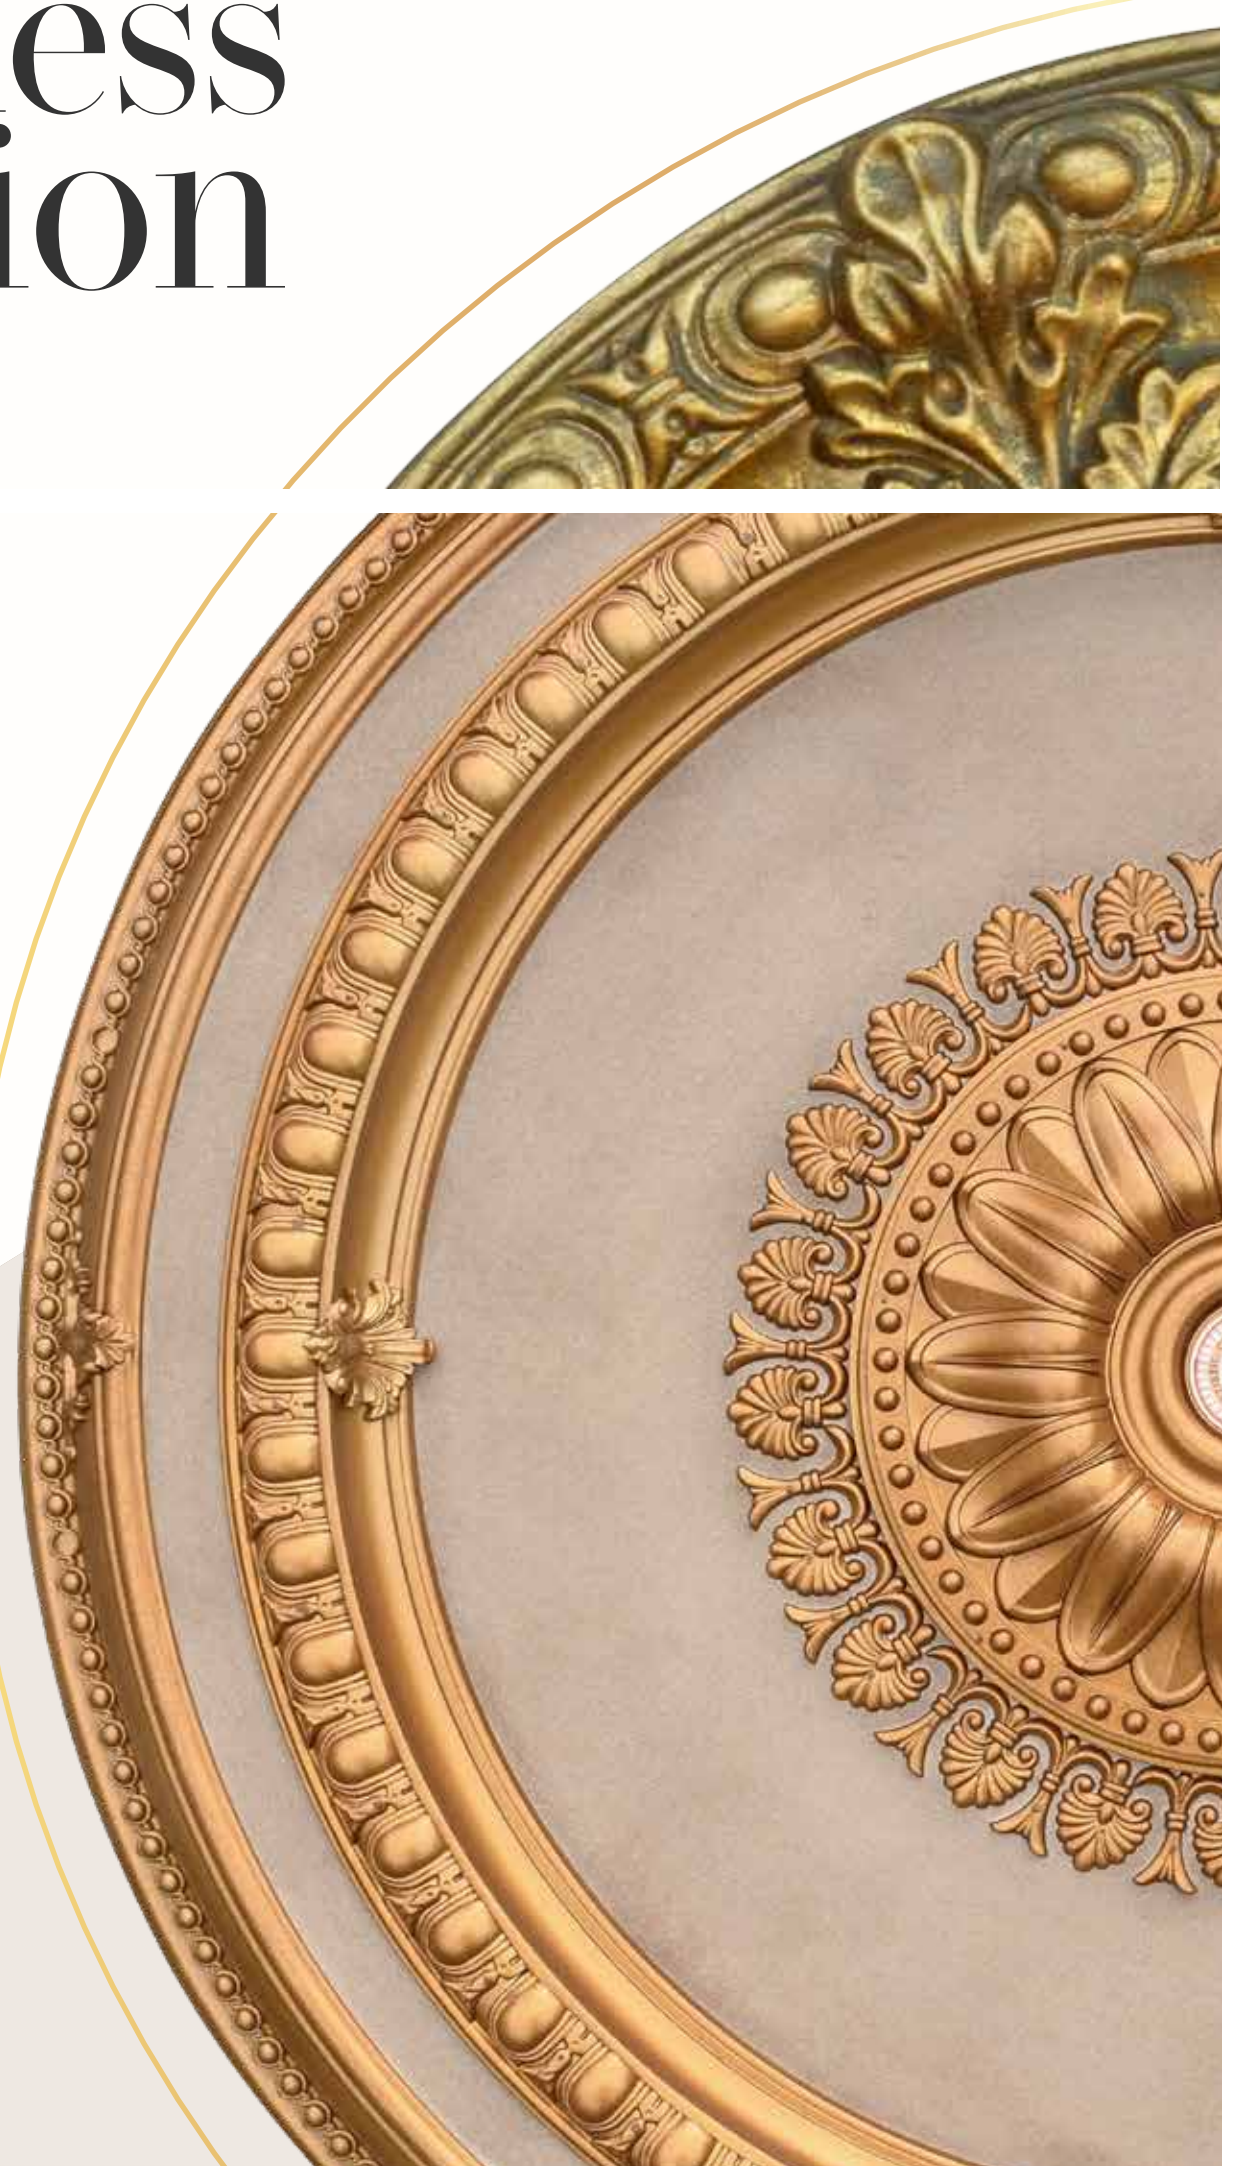

Handcrafted Quality for any Home

Unique Ceiling Decor

Our antique chandelier medallions accent ceiling lights and fans with old-world elegance.

Grandeur from Top to Bottom

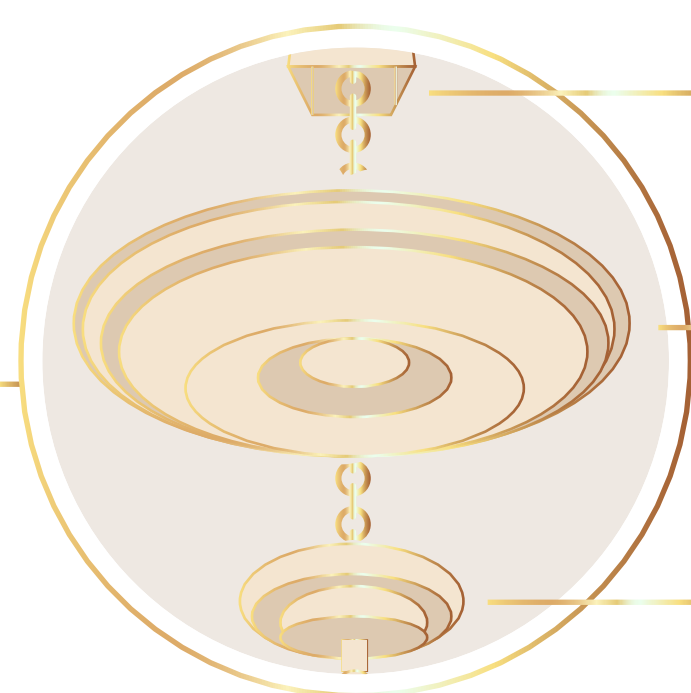

Whether you want your room to evoke art-deco decor, modern rococo, or fancy opulence, our chandelier medallions will draw the eye upward.

Installation

For a 24-inch medallion or smaller, apply architectural adhesive and use finishing nails around the center hole to create a complete professional-looking installation. For a 36-inch medallion or larger, insert screws or hollow wall anchors into the outer ring spaces alongside the included decorative caps.

We based this installation procedure on our crown molding's equally accessible install process. Just like the medallions, our crown molding requires only simple finishing nails or a small amount of adhesive glue — for a professional-looking result right at home!
