

Thank You

for bringing me home!

Spruce Me Up

I've been in a dark box traveling. Here are some quick tips to get me settled:

- Remove yellow leaves or broked stems.
- If my soil is dry, give me a drink of water.
- Set me in the right light.

PLANT CARE

Pilea Peperomioides

Light

I like bright, indirect light where I cast a strong shadow at least a couple of hours a day, but don't mind medium light

Water

I don't want my roots to stay wet, so let the top inch or two of the potting soil dry before you water me again.

Food

I don't need a lot of fertilizer, so you can feed me once or twice in spring and/or summer. You can feed me more often if you want me to grow faster.

Features

My unique leaves set me apart and have earned me common names like UFO plant, pancake plant, and Chinese Money Plant.

Growing tips

I'm super-easy to propagate and share. Repot me every year or two, as my roots fill at least 75% of the pot.

Give me friends! I play well with:

Peperomia, Pothos, Dracaena
