Installation suggestions

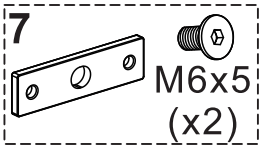

Sometimes there will be some issues when install the track such as a mismatch between studs and pre-drilled holes on the track.
To avoid that we recommend using a head board on all installation scenario.
The size of the head board should better be 1''x4'' or 1''x6'' and a bit longer than the track.

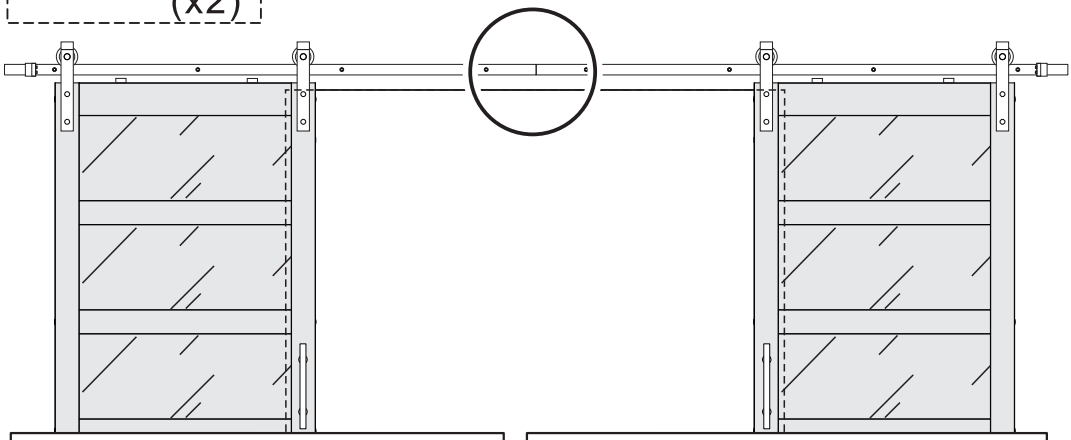

***Please note that the head board and matched screws are not included.**

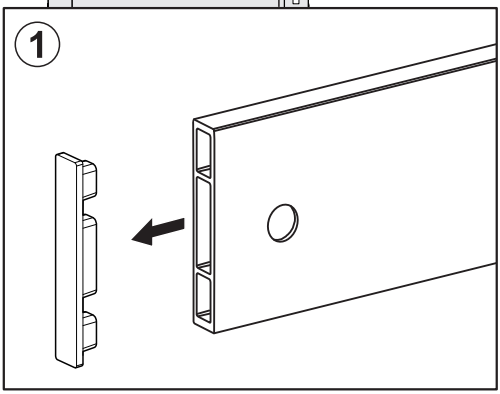

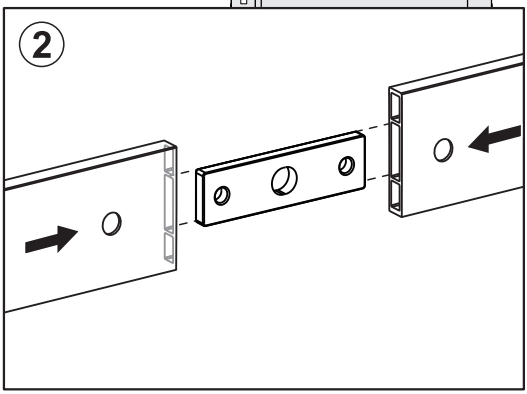

Only for 2 doors

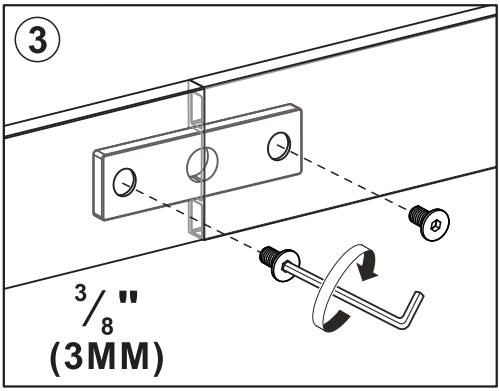

If you have 2 sets. Please remove the plastic cover at the end of the track. Then connect the rails with connectors.

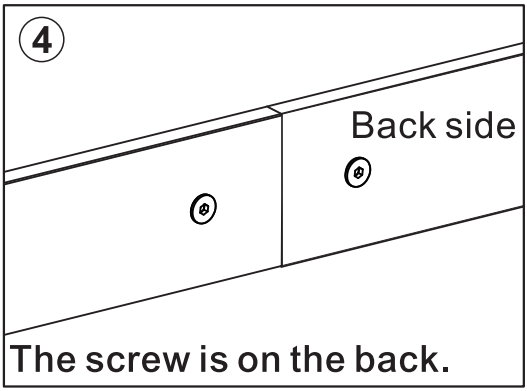

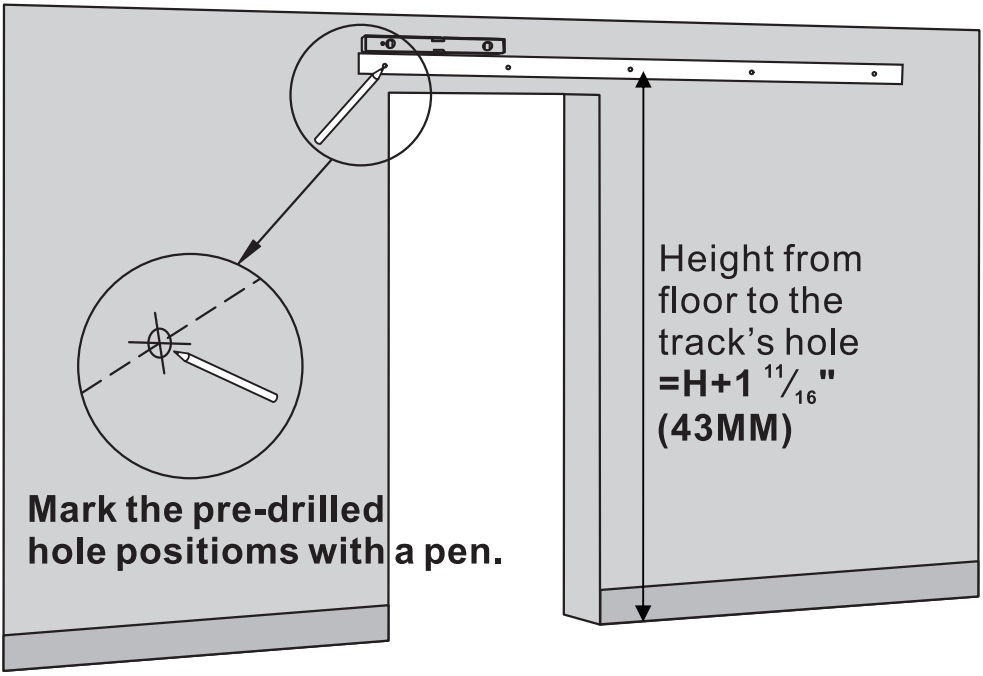

Step-1

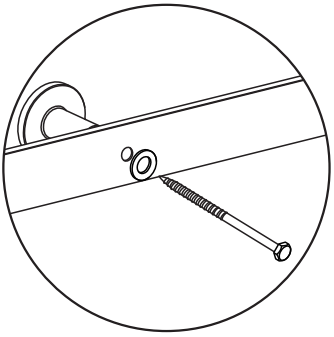

Place the track H+1 $^{11}/_{16}$" above the floor and mark the position of the spacer holes.

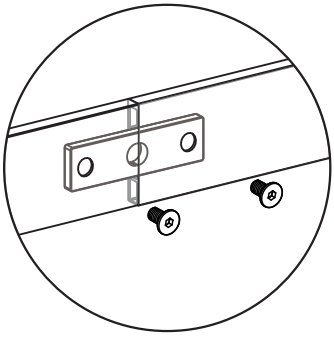

Track installation types

If the rail is too long, the whole rail will be combined with pieces.
