

**DON'T LET YOUR YARD BE A FLY PLAYGROUND,
MAKE IT A FLY JAIL!**

**FOR OUTDOOR
USE ONLY**

Disposable

JUST ADD WATER AND HANG!

1

Fill the trap with warm water up to the fill line.

2

Position the cone downward to allow fly entry.

3

Insert the top cap into the small holes on the casing and hang!

4

Be patient; trap activation may take up to 24 hours.

TRAPPING TIPS

FOR OUTDOOR USE ONLY

Hang 30 feet away from the area that you want to protect to draw the flies away.

USE WARM WATER AND SHAKE

This will shorten the bait activation.

HANG IT OUT OF THE WIND

If flies get blown away by the wind, they can't enter the fly trap!

WAIT 24 HOURS

It may take up to a day for activation, depending on the weather conditions.

ADD MORE WATER?

Dry traps do not work!
Keep water level at fill line.

RIGHT TIME, RIGHT PLACE

Place fly traps in the sun during warm weather and in the shade on hot days to match seasonal fly activity.

HANG **30 FEET** AWAY FROM INHABITAT AREAS TO DRAW FLIES AWAY

CHICKENS

DECK

GARAGE

HORSES

PORCH

Strategically place your trap, equipped with Flies Inn fly attractant bait, away from competing odors.

For optimal effectiveness, position the trap near ground level when animals are present.

PUTS ALL COMMON FLIES BEHIND THE BARS

Harmless to bees or other helpful pollinators
