

1

Our sofa comes in 2 box and may be delivered at different times.

2

Please be patient for a few days, and your sofa will be delivered to you.

3

Carefully open the compression bags, making sure not to cut your hands or damage the items inside with scissors.

4

Due to the packaging compression for shipping, the fabric may have wrinkles. This is normal, so please don't worry.

5

Place the sofa in sunlight and gently pat each section.

6

At the same time, massage your cushions as if you're fluffing them, allowing the air to fully circulate through the foam.

7

Then let the sofa sit undisturbed for 72 hours.

8

If there are still minor wrinkles, you can try ironing the sofa.

Tip: 1. Our sponge sofas are made with an upgraded wrinkle resistant fabric and advanced mattress technology. Minor wrinkles and bends are normal and not considered a quality issue.

2. Due to differences of light effects and fabric's reflective nature, the actual color of the materials might be slightly different from the pictures.
