An advertisement for Magic Pond Rock. At the top is the logo, which consists of a blue irregular shape containing a chemical structure diagram and the text "magic POND ROCK" in white and pink. Below the logo, the text "Give Your Pond a Little Magic" is written in a bold, dark blue font. A horizontal pink line separates this from the text "52-Week Pond Treatment", which is also in bold, dark blue. The lower half of the image features two koi fish: a large one with white, black, orange, and red patterns, and a smaller one with yellow, black, and orange patterns. Below the fish is a large, irregular, pinkish-purple rock. The entire background is white with faint, light blue hexagonal patterns.

What Does Magic Pond Rock Do?

- All-Natural Algae Mitigation
- 52-Week Pond Treatment

Works Like Magic

Magic Pond Rock is made by a proprietary, nano-porous manufacturing process and contains **1,000X** the surface area of coral. It comes inoculated with Level 1 safe bacteria that start to multiply immediately when placed in your pond and thrive on the same food as algae, only faster. The result is clear, chemical-free, all-natural, algae-free water for you and your fish to enjoy.

Just Place in the Pond Near Flowing or Moving Water and Let Nature Do the Rest

 Superior Algae Mitigation, Set-and-Forget Solution, Saves Time, Good for Up to One Year

 Fish-Safe, All-Natural, Chemical-Free Technology

 Crystal Clear Water Visibility

 Strongest, Healthiest, Natural Bacteria that's Ideal for Fish

Instructions

Magic Pond Rock is easy to use. Just place your Magic Pond Rock in your pond near flowing or moving water and let nature do the rest.

To ensure maximum efficacy, just check the Magic Pond Rock every three months to make sure it is not clogged with debris, such as leaves, from the pond. If it becomes clogged, simply remove your Magic Pond Rock and gently clear away the debris by hand or with a soft bristle brush. Magic Pond Rock can chip and crack if scrubbed too vigorously, but this will not interfere with algae mitigation. However, do not let Magic Pond Rock freeze, as that can cause the rock to disintegrate and reduce its effectiveness.

Replace your Magic Pond Rock every 12 months.
