# IMPORTANT INFORMATION

To avoid the risk of electrocution, please turn OFF the electricity supply mains before commencing the installation.

Do not stand the mirror upright on hard surfaces whilst fitting as this will damage the edge. Keep the plastic corner protectors on until installation is fully completed.
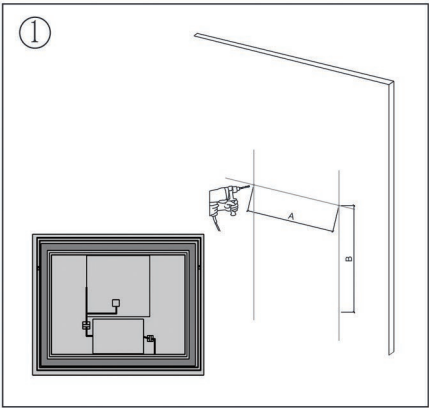

⚠️

Tips: The mirror can be Horizontally Mounted or Vertically Mounted.
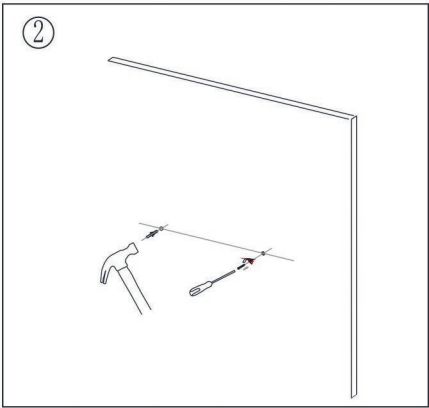

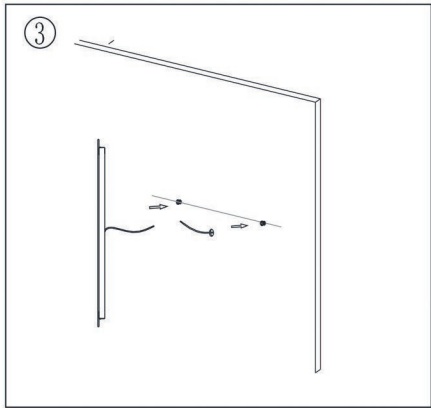

1. Installation

**Note: Keep the plastic corner protectors on until installation is fully completed.**

① Measure the distance of the mounting hole, Drill holes with a suitable sized drill.

② Insert the anchor and mounting screw into the wall.

③ Connect the mirror wires with your main wires and hang the mounting hole to the screw on the wall.

④ Peel off the protective film and clean the mirror with a soft cloth.
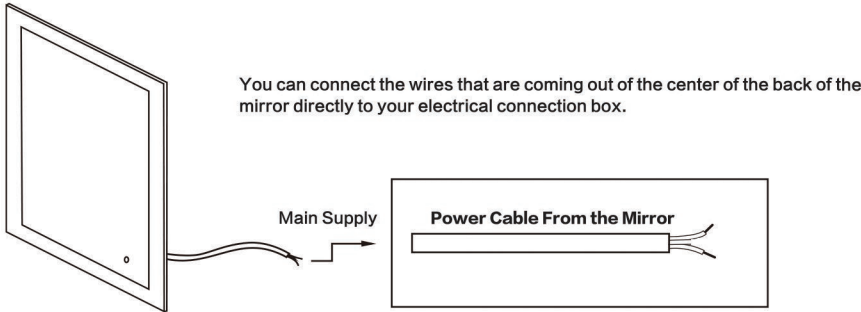

2. Power Connection Instruction

Before you start the installation, please ensure that:
-the wall where the product is being installed is able to support the weight of the product
-the main electrical supply has been powered off to complete installation

The terminal connection method： A power cord on the wall is connected to a power cord on the mirror.There are 2 terminals in total.
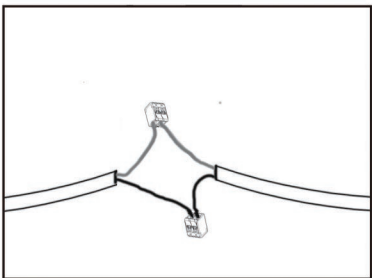

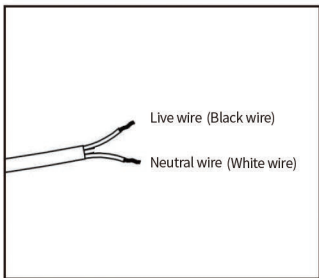

There are two wiring methods:

1,Connect the wire of the mirror to the wire of the wall switch.

(1) You would see there   2   wires with   2   colors--white and black.

(2)Safely connect these   2   wires one by one to the wires of the wall switch in your home

You can connect the wires that are coming out of the center of the back of the mirror directly to your electrical connection box.

Main Supply → **Power Cable From the Mirror**

- White= Neutral wire connect to the White Neutral wire in your box.
- Black= LIVE wire connect to the Black LIVE wire in your box.

Live wire (Black wire)
Neutral wire (White wire)

2,Connect the wire of the mirror to the wire of the plug and plug it into the socket

The plug has three wires,

If there is a ground wire
Green=GROUND wire connet to the middle wire of the plug.

- White=White wire connecting the plug wire to the neutral wire
- Black=the black wire connecting the live wire to the plug

If there is no ground wire

- White=White wire connecting the plug wire to the neutral wire
- Black=the black wire connecting the live wire to the plug

Operation

Lights and defogging will be automatically turned on when the power is turned on.

Lighting Color Adjust

Short touch the power button to adjust the lighting color.

It has three colors to select,natural light/warm yellow/white light

⏻
1. Short touch the power button to turn the light ON/OFF. Shirt touch again to choose the light(natural light/warm yellow/white light).
2. Long touch the power button to dim the currently selected light.

〰️
3. the defogging function will turn off automatically after one hour in order to save electricity. If you want to re-open this function, you can re-touch the switch.
