

HEX HEAD

MULTI-PURPOSE

Skip pre-drilling and enjoy fast starts with CAMO® Hex Head Multi-Purpose Screws. These code-compliant screws replace traditional lag screws and through-bolts in projects like deck posts, beams, and other general construction projects.

PROTECH® **ULTRA 4** COATING INDUSTRY LEADING COATING SYSTEM

Our proprietary PROTECH Ultra 4 four-layer coating system protects your connections against the harshest environmental elements. Each layer works together to provide optimum corrosion resistance, UV and environmental protection, and torque reduction for a high-performing, long-lasting screw. Tested in accordance with ASTM G198, the coating meets or exceeds the protection of code-approved hot-dip galvanized (ASTM A153, Class D) in ground contact general use pressure treated lumber (AWPA UC1-UC4A).

Our coating is tested 2X longer than industry standard - so you can be confident your connections will last.

HOT DIP GALVANIZED

Our hot-dip galvanized (HDG) coating is durable, long-lasting, and offers premium protection against corrosion. This code-approved coating is tested to meet ASTM A153, Class D standards and is approved for use in ground contact general use pressure-treated lumber.
