

Titan PRO JUPITER XL

- Handles up to 6'6"
- 3D & L-Track Massage
- Space Saving Technology
- Head & Full Body Massage
- Zero Gravity Recline System
- Designed to handle up to 6'6"
- Heating in the Lower Lumbar
- Bluetooth Phone Answer System

Titan Pro Jupiter XL Features

Come experience the very 1st **L-Track Massage System with 3D technology** by Titan. This chair delivers an incredible massage and is engineered to accommodate tall people up to 6'6". With the combination of 3D technology and the L-Track, the feel of the massage truly is out of this world! Titan invites you to experience it for yourself and feel the difference.

3D & L-TRACK MASSAGE

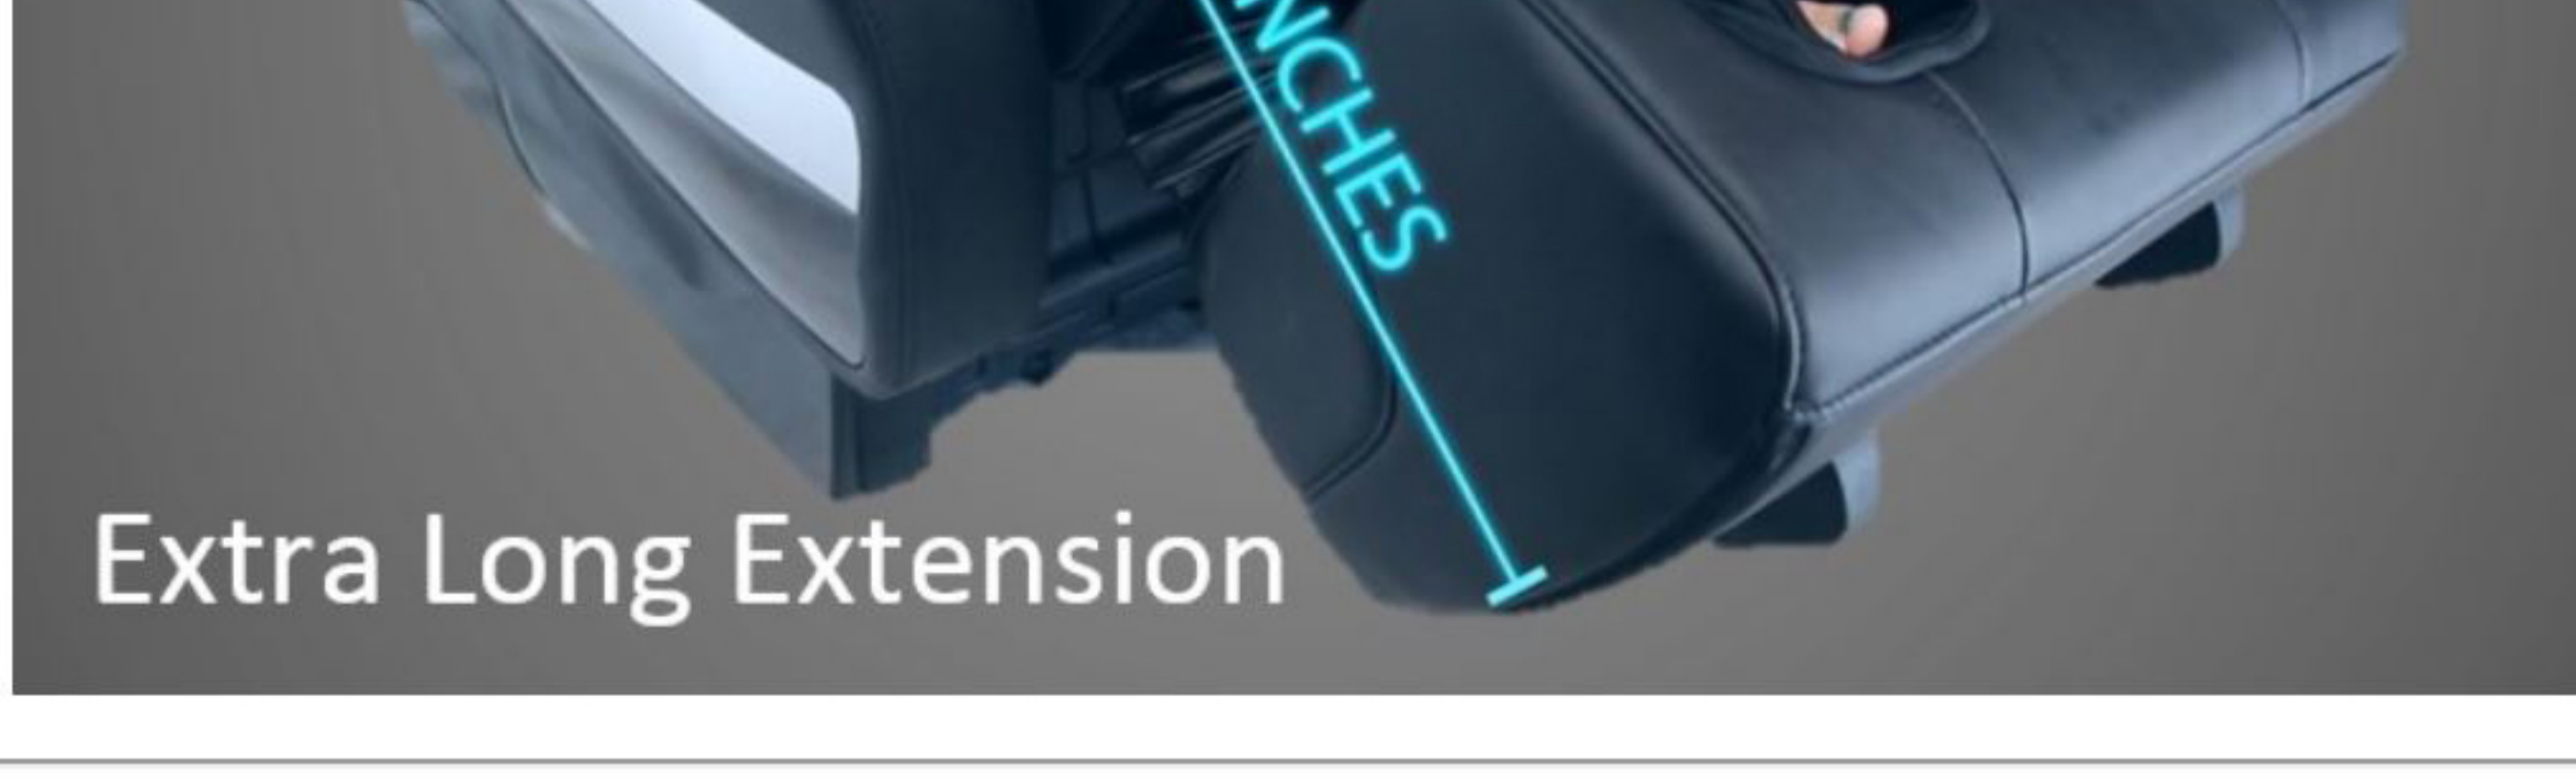

Robotic massage system is equipped with 3D massage technology that can NOT be manually controlled and is activated determining on the massage selected. a long way since pioneered in the 1950's. The latest innovation of the **3D massage** helps contour the back with pin point accuracy, delivering a consistent massage pressure top to bottom as it extends in and out hugging the curves of lumbar and shoulder/neck region. Most traditional massage chairs will stop at the hips where as the L-Track allows for the rollers to extend past the glutes, reaching the top of the hamstrings.

For the first time ever, Titan has integrated both technologies in one chair through extensive research and development.

XL - DESIGNED TO HANDLE 6'6"

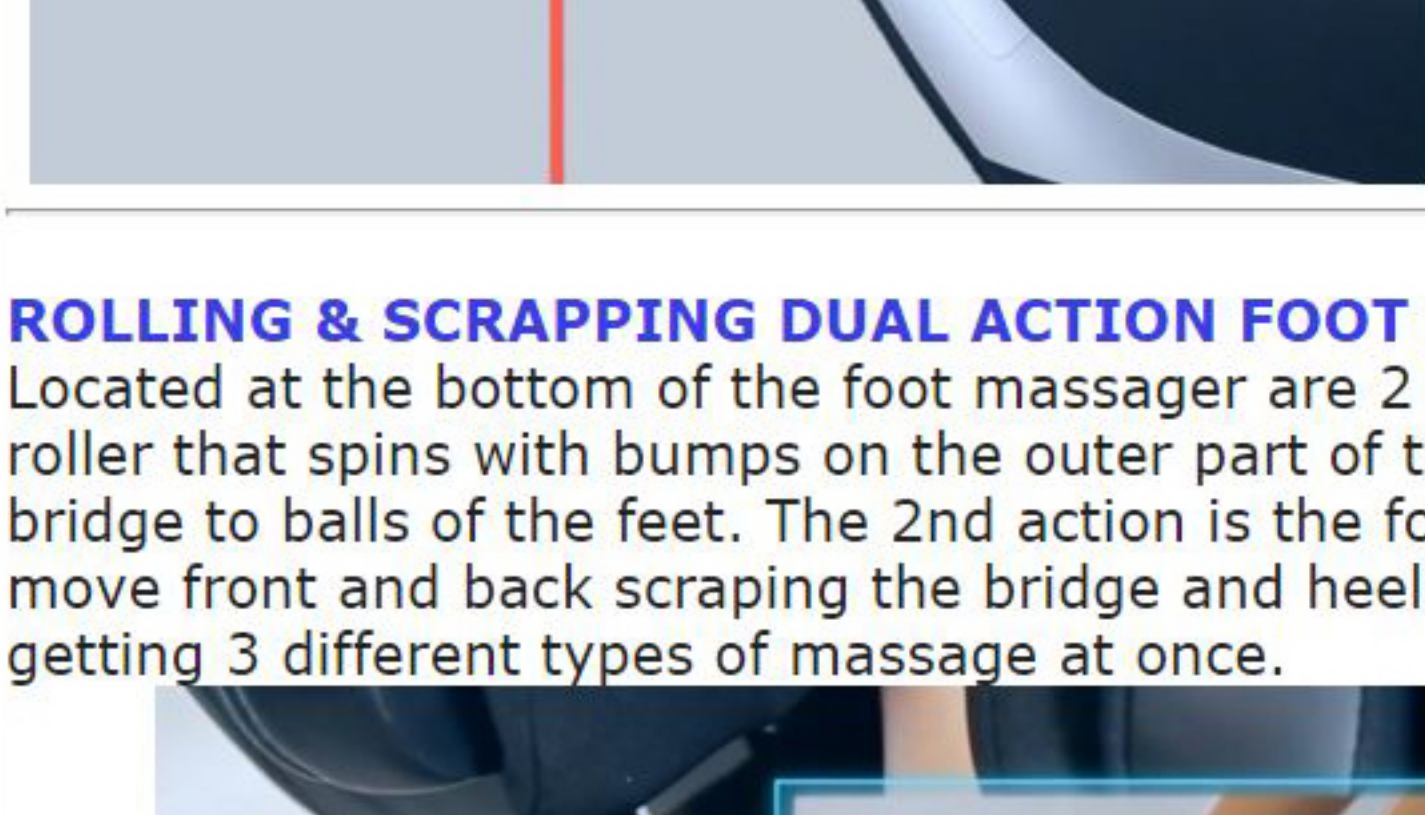

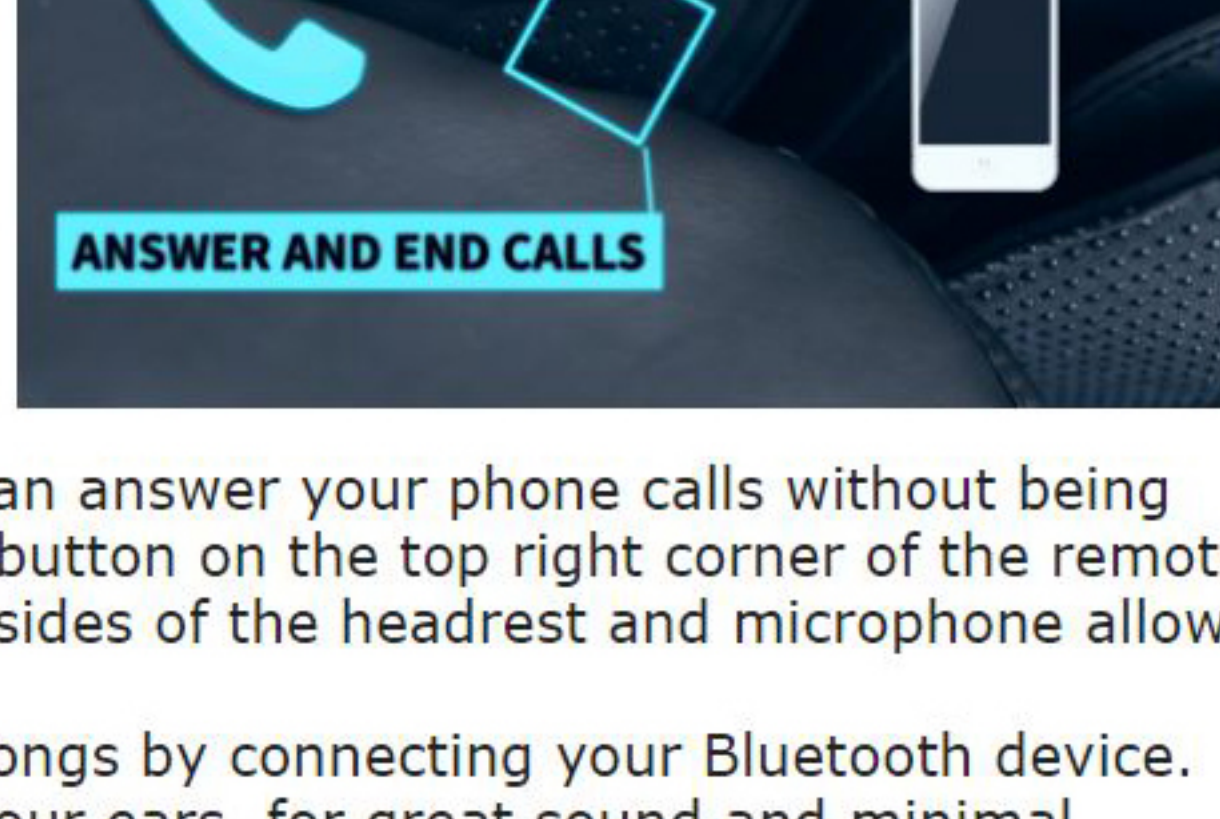

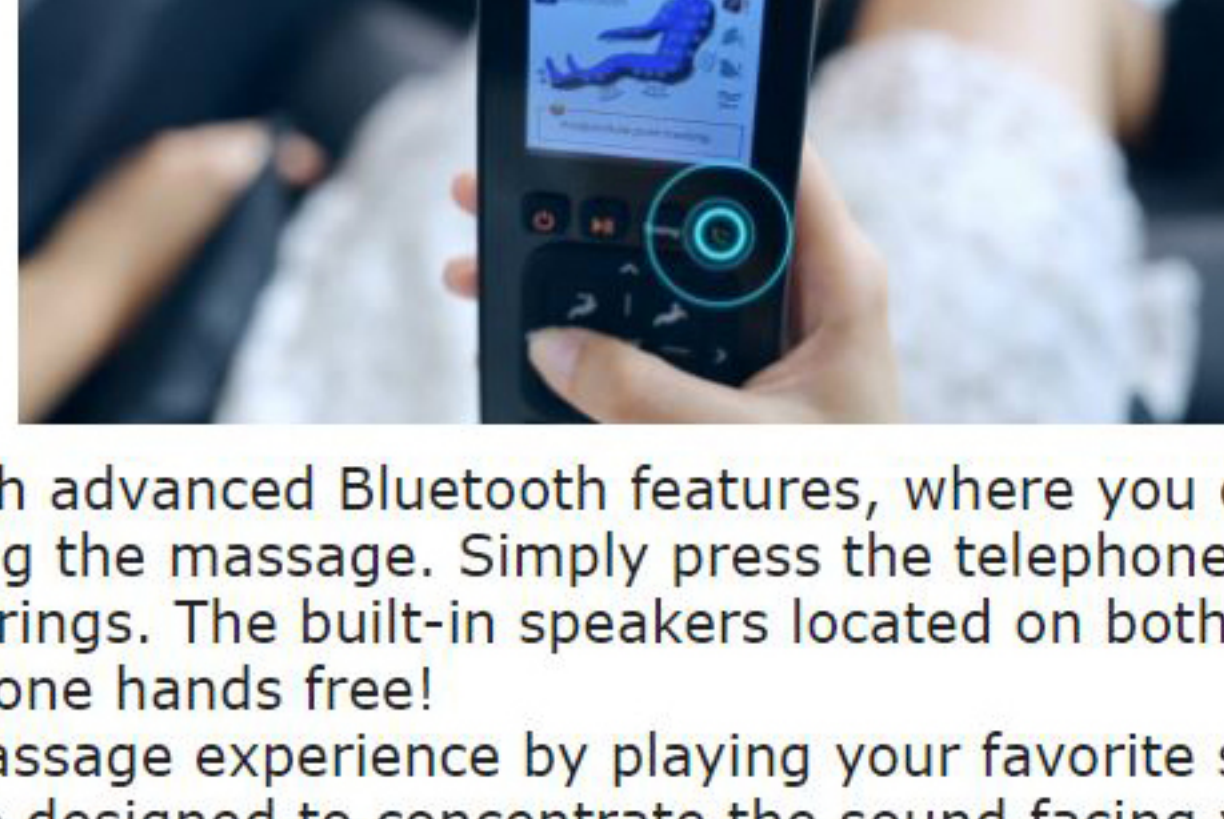

The Titan Jupiter is first of its kind to specifically cater to the taller person, **handling up to 6'6" in height**. Most massage chairs have a maximum extension of 8-9 inches. The Titan Jupiter has engineered its tracks to extend out an additional 12.6 inches from the default position. Finally, a chair truly for the taller person! Although designed to accommodate the taller person, it still fits like a glove even at 5 feet. The seat base has also been widen by 2" more than the standard, giving it a total of 21" of seat clearance.

BLUETOOTH FOR PHONE & MP3

The Titan Jupiter is equipped with the latest conveniences technology has to offer. The chair is fitted with advanced Bluetooth features, where you can answer your phone calls without being interrupted during the massage. Simply press the telephone button on the top right corner of the remote when the phone rings. The built-in speakers located on both sides of the headrest and microphone allow to talk on the phone hands free!

Enhance your massage experience by playing your favorite songs by connecting your Bluetooth device. The speakers are designed to concentrate the sound facing your ears, for great sound and minimal volume.

SPACE SAVING TECHNOLOGY

Most typical massage chairs consume a lot of space, especially when in the recline position. Massage chairs require up to 3 feet behind the backrest for the chair to fully recline. Titan's innovative design team has engineered a space saving technology that slides the chair forward as the chair reclines. Only 3.2 inches of space is required from the wall when reclining back!

ROLLING & SCRAPPING DUAL ACTION FOOT MASSAGE

Located at the bottom of the foot massager are 2 different types of Massage enhancements. The 1st is a roller that spins with bumps on the outer part of the wheel, to mimic the feel of thumbs pressing on the ball to balls of the feet. The 2nd action is the forward and back motion, where the rounded points move front and back scraping the bridge and heels of the feet. With the airbag compression, you are getting 3 different types of massage at once.

UNIQUE HEAD MASSAGE

The Titan Jupiter has reinvented the head massage, perfecting the pressure applied to sides of the head. The air will inflate on the sides of the pillow expanding like an accordion, intended to squeeze the temple region, delivering a soothing massage.

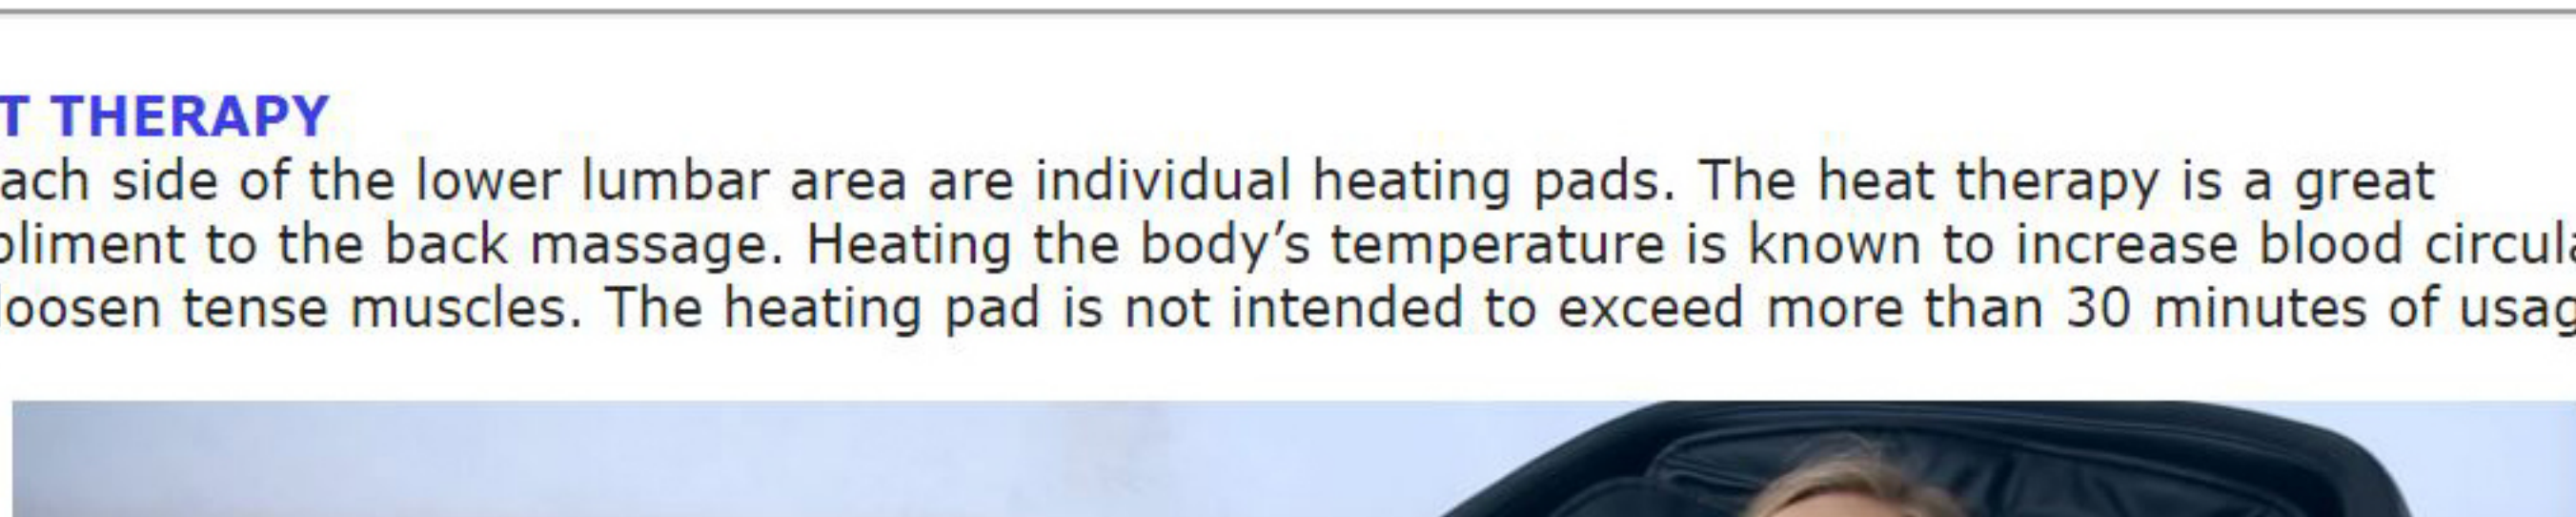

ZERO GRAVITY RECLINE

Inspired by NASA technology, the Zero Gravity position is the perfect position to enjoy a massage, aligning your back relative to your thigh at an optimal level of comfort. When reclined into the zero-gravity position, the complete weight of your back is virtually supported by the backrest which maximizes the intensity of the massage. There are 2 stages of zero gravity, the 2nd being more reclined, to where your legs are higher than your heart level.

HEAT THERAPY

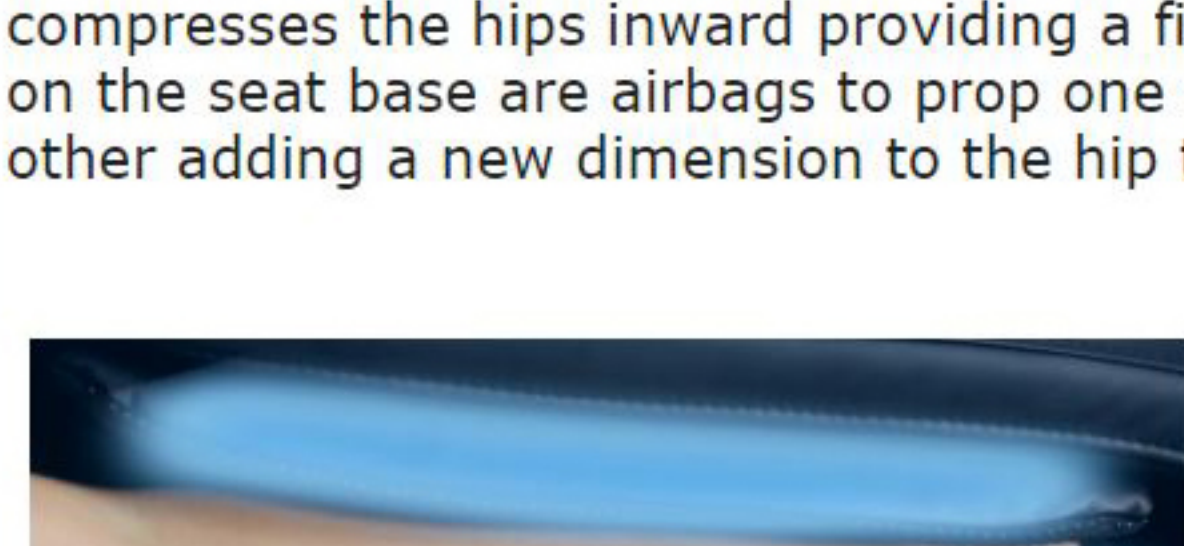

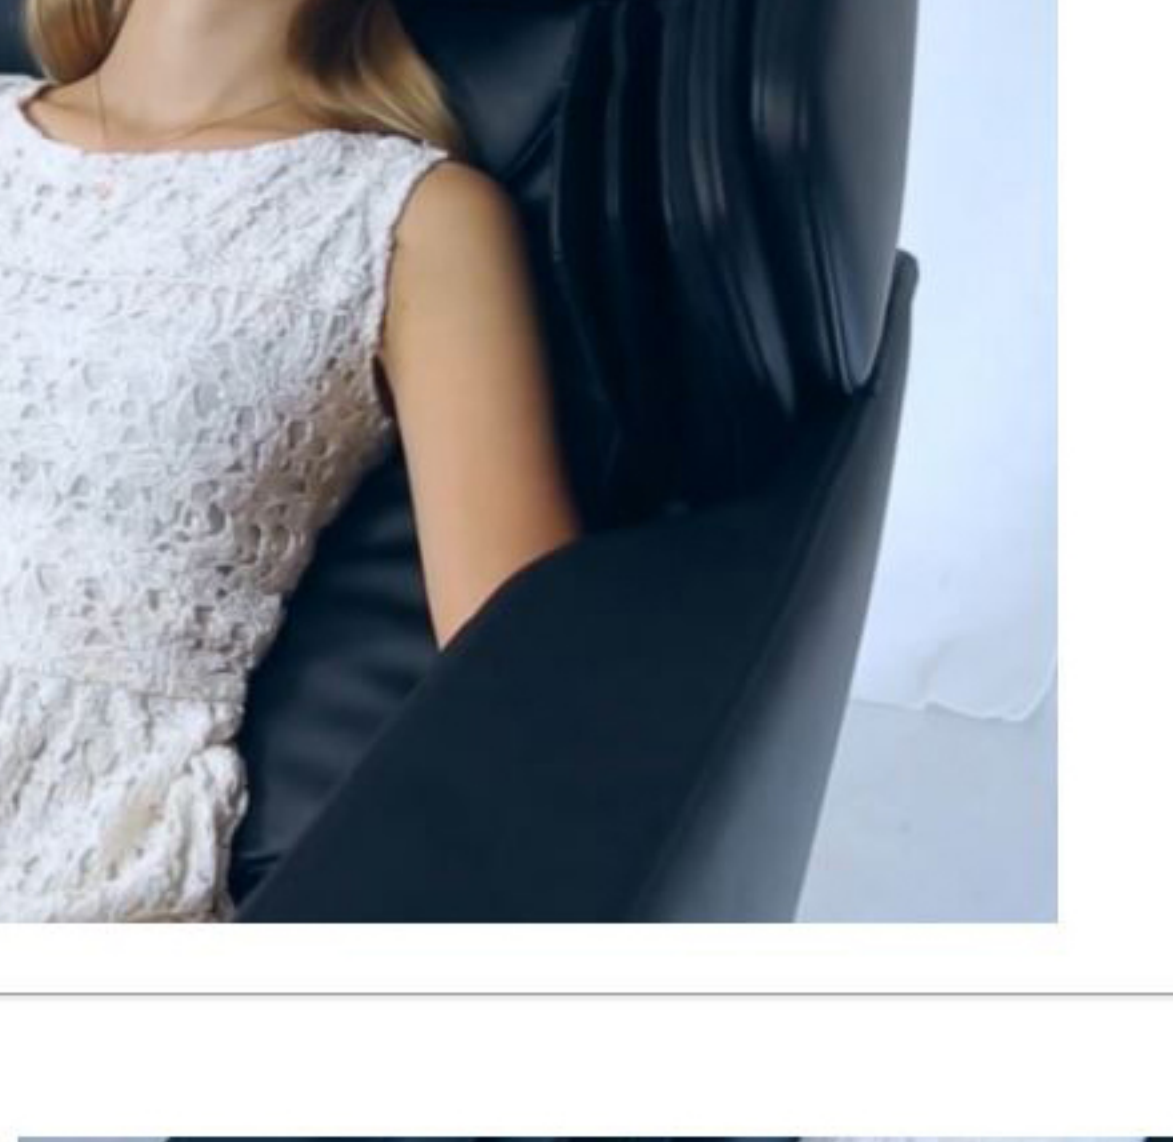

On each side of the lower lumbar area are individual heating pads. The heat therapy is a great complement to the back massage. Heating the body's temperature is known to increase blood circulation and loosen tense muscles. The heating pad is not intended to exceed more than 30 minutes of usage per day.

FULL BODY AIR MASSAGE

Hip Massagers

The hip massagers inflate and deflate creating a multitude of different massage actions. When only one side inflates, it promotes a twisting action. When both sides inflate, it compresses the hips inward providing a firm squeeze. Located on the seat base are airbags to prop one side higher than the other adding a new dimension to the hip twist.

Arm Massage

The arm massager is 20" in length, composed of 4 airbags per side that surround the forearms, wrist and hands. The inner lining is made of durable spandex that comfortably contours the shape of the user's arms.

Outer Shoulder
Along the outer edges of the left and right sides are a set of air bags to provide a **kneading/squeezing** style massage to the outer shoulder area.

Calf and Foot Massage

The foot and calf area has are airbags, each uniquely placed to hit the vital muscle areas. The air bags will **inflate and deflate** creating a squeezing like action. The intensity of the pressure can be controlled from the remote control.

Easy to use HD LCD Remote

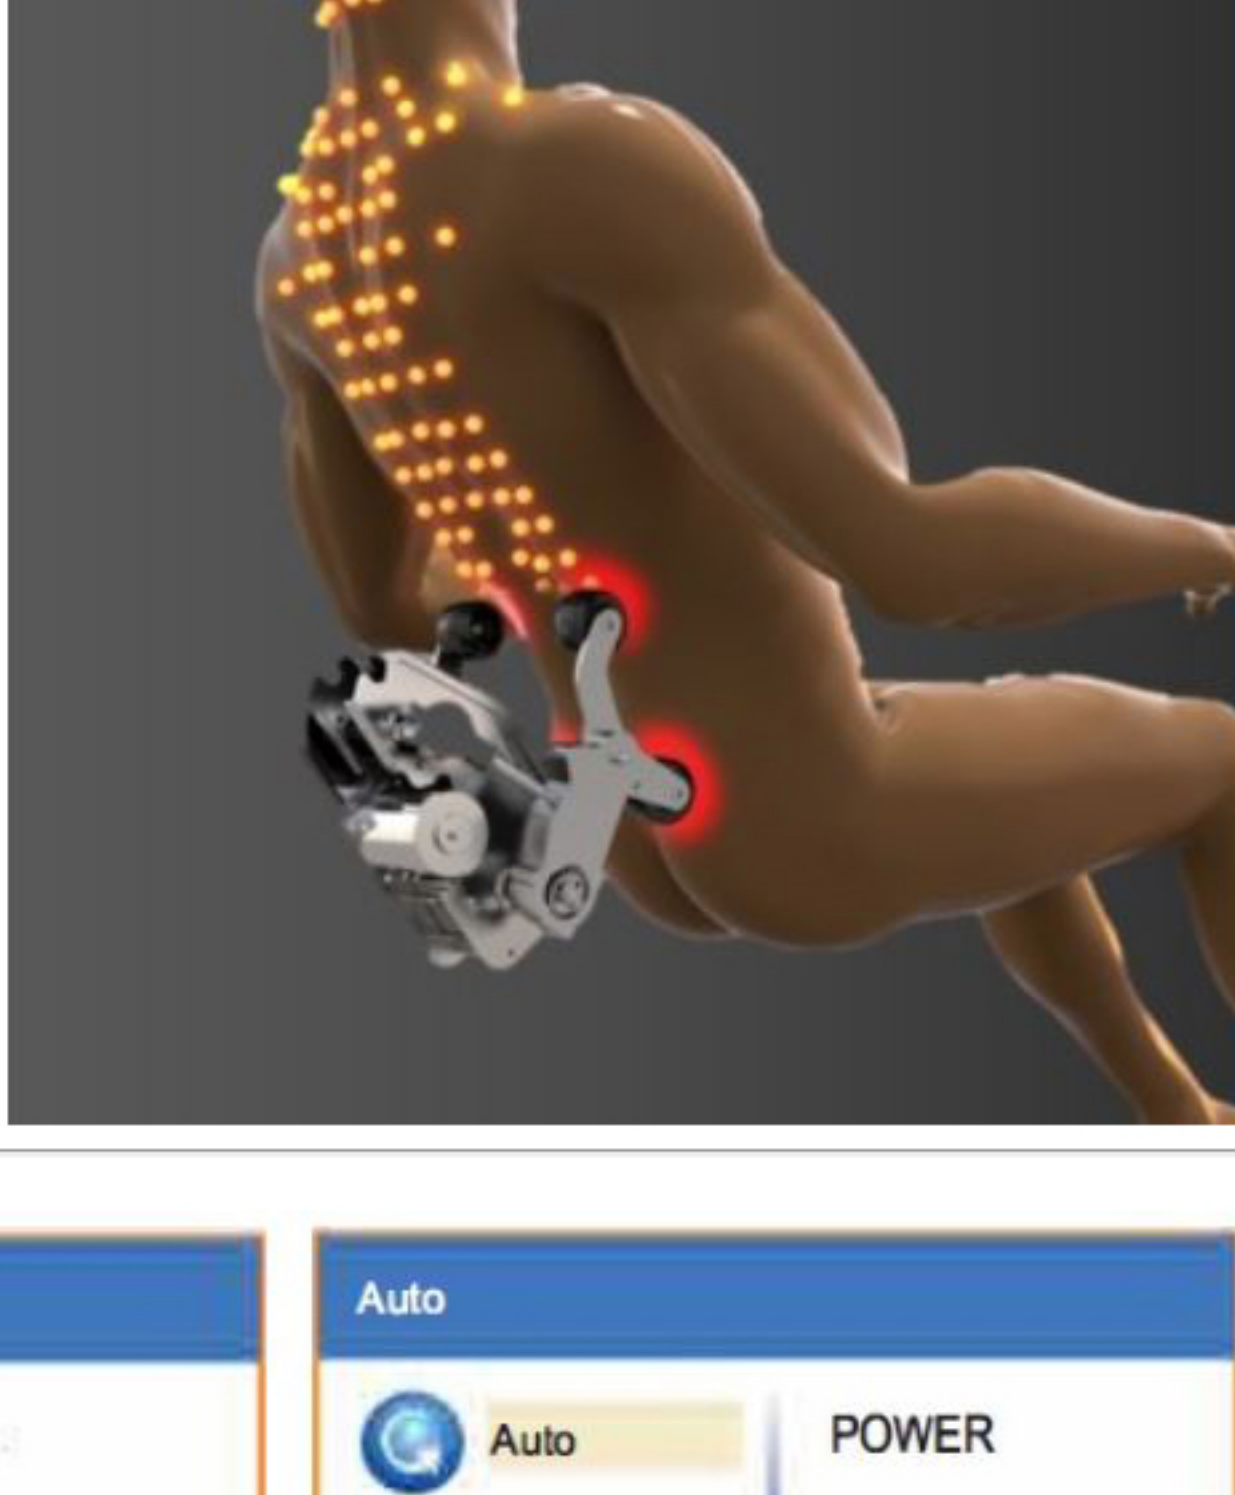

The Titan Pro Jupiter provides an easy to use experience with the bulkiness of past remotes.

The compact remote with large and easy-to-view LCD screen is packed with features.

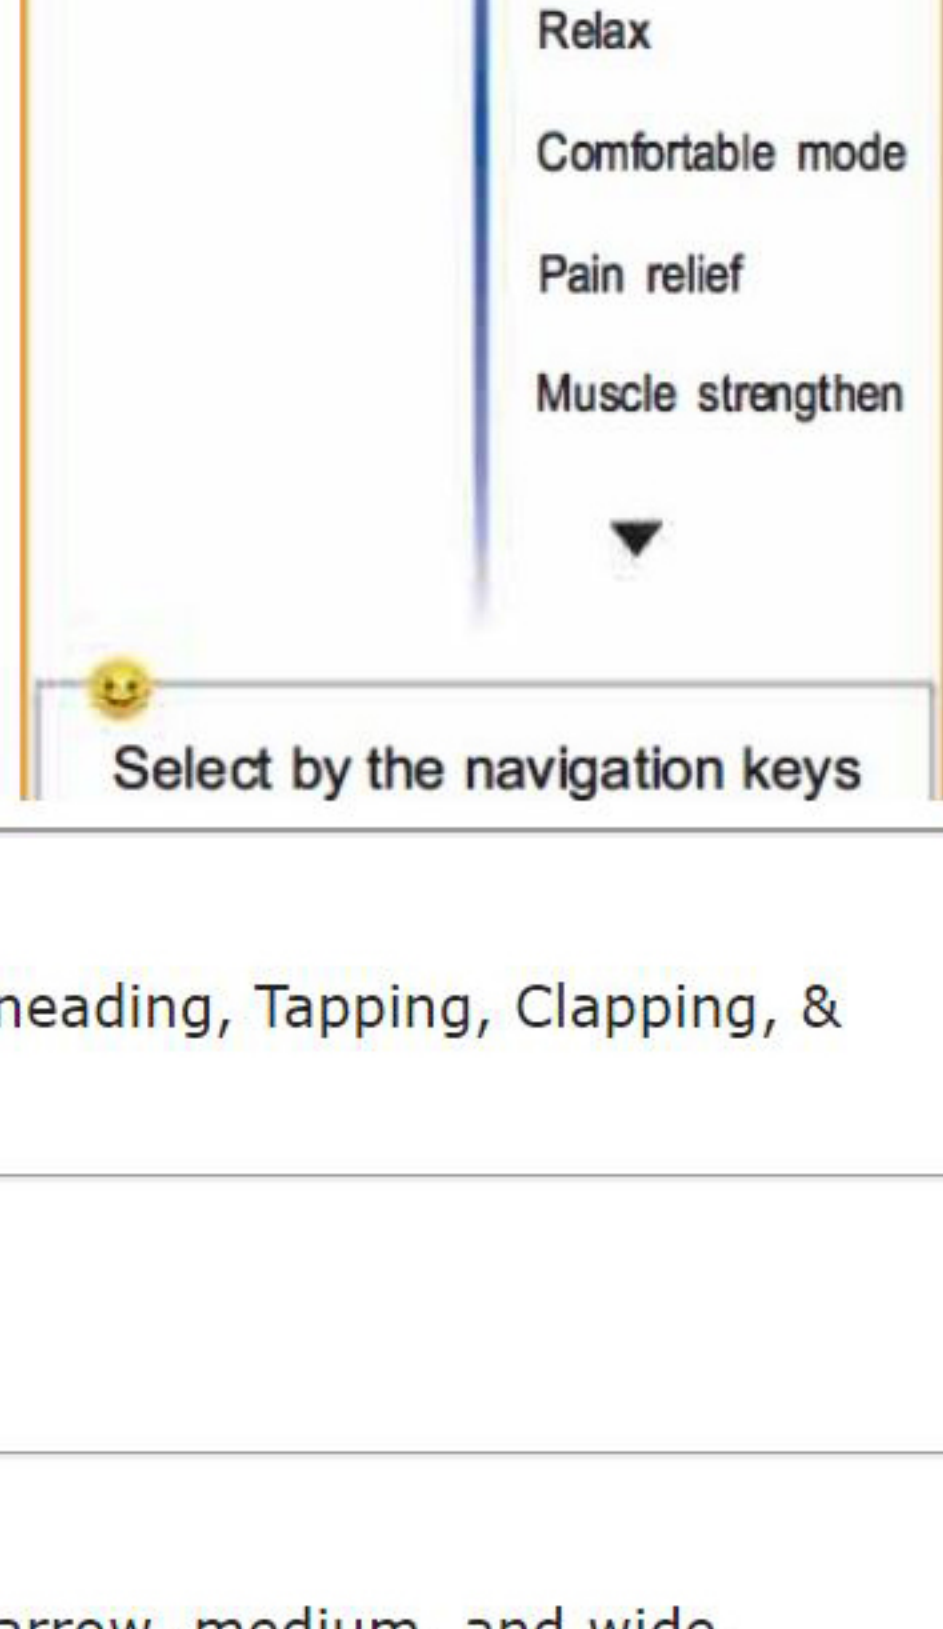

COMPUTER BODY SCAN

Equipped with the latest technology, it allows for the rollers to map the back curvature with even more accuracy, which translates into a more precise massage hitting all the key areas. Regardless of your body type this highly advanced chair can measure many body types making each massage experience feel customized.

10 PRE-SET PROGRAMS

Select from 10 pre-set programs (Power, Sleeping, Vitality, Relax, Combination, Pain Relief, Muscle, Circulation, Waist, and Stretch), each uniquely programmed to deliver a variety of massage combinations. When the "Auto" button is pressed us the remote scrolling pad to select the massage program.

5 Massage Styles

The Titan Pro Jupiter XL has 5 professional massage techniques, 3D, Kneading, Tapping, Clapping, & Shiatsu.

5 Speed Control

The speed of the massage can be increased by 5 escalating speeds.

Massage Width

The width of the massage can be adjusted to 3 different widths from narrow, medium, and wide.

Air Intensity

The air intensity can be adjusted to 5 levels of intensity. The air intensity can be independently by region.

SPECIFICATIONS

Product Name	Titan Pro Jupiter XL
Rated Voltage	110-120V
Rated Frequency	50/60Hz
Maximim Weight of User	270lbs
Height Range	4'10" - 6'6"
Packaging Box Size #1	60" x 31" x 41"
Packaging Box Size #2	21" x 18" x 21"
Packaging Box Size #3	49" x 16" x 26"
