## Dimensions

## Installing Your Microwave

- This microwave oven is designed for adaptation to the following three types of ventilation:
  - A. Outside Top Exhaust (Vertical Duct)
  - B. Recirculating (Non-Vented Ductless)
  - C. Outside Back Exhaust (Horizontal Duct)
- The space between the cabinets must be 30" wide and free of obstructions.
- This microwave oven is for installation over ranges up to 36" wide.
- The microwave must be level. Use a level to make sure the cabinet bottom is level. If the cabinets have a front overhang only, with no back or side frame, install the mounting plate down the same distance as the front overhang depth. This will keep the microwave level.
