

Van Zyverden's
OXALIS KIT WITH ARTISAN DECORATIVE PLANTER

These purple shamrocks (*Oxalis Triangularis*) are often called The Good Luck Plant, due to their four clovers. They are easy and fun to grow, and their striking, purple foliage really sets them apart.

Guaranteed to grow

*Kit comes with everything one
needs to grow this exotic plant.*

Easy holiday indoor color

About This Variety: Our Oxalis kit comes with everything you need to grow this exotic plant: six Oxalis bulbs, a 5x7" trendy, antique, copper-like, decorative outer planter, a 5" nursery pot, planting medium and a set of growing instructions. As bulbs are essentially storage mechanisms, they already contain everything needed to produce flowers. All you will need to do is water.

Growing Instructions: Simply expand the soil, following the directions, fill the nursery pot with 4/5 of the medium, position the bulbs, and cover with the remaining soil. Then water well, not letting the pot dry out. After Care: After a period of active growth, the plant should be allowed to rest or go dormant. The first sign that a plant is entering dormancy is leaf die-back. If this begins to occur, stop watering and fertilizing the plant. Then leaves can then be cut back or allowed to die-back on their own. The plant should be moved to a cool, dark place for one to three months, after which new foliage will start emerging from the soil. When this occurs, move the plant to a full sun location and restart the process all over again by watering and fertilizing.

Care Tip: Refrigerate bulbs until you are ready to plant them

Exposure: Full sun to partial shade

Height: Grows 6" tall

USDA Zones: Hardy in USDA zones 8-10

Guaranteed to grow 1 year from purchase if directions are followed. Any concerns related to quality and/or counts feel free to contact us.
