Installation Instructions

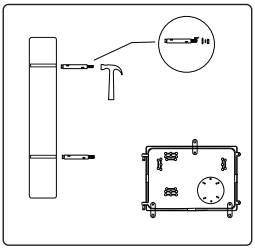

WYZM LED Wall Pack Light

1. This instruction is only for led wall pack light with 3 mounting brackets.
2. This products must be installed by professional electrician.
3. Please install the products with the instruction manual.
4. Any LED technical questions and installations, please contact us or local distributors for help. Email: Admin@gbgreensun.cn

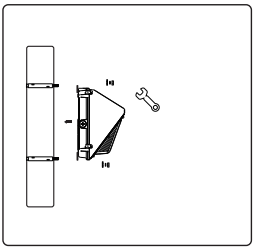

Step 1

1. Note: Cut off the power before installation. Drill holes with percussion drill in line with the hole position from the wall.

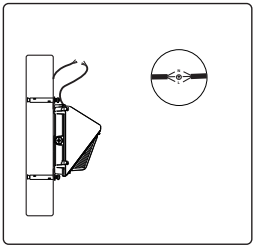

Step 2

2. Use a hammer to drive the metal expansion screw into the drilled hole on the wall.

Step 3

3. Match 3 mounting brackets to the metal expansion screw, then fix the fixture on the wall by screws.

Step 4

4. Connect the wires correctly : AC/L match black; AC/N match white; PE/G match ground.
