WORLD LEADER IN ROBOTIC MOWING SINCE 1995

More than 20 years of research, innovation and lush, green lawns have made Husqvarna Automower® the world leader in robotic mowing. Designed for functionality and durability, it works quietly, efficiently, and autonomously to give you a perfectly cut lawn, rain or shine, night and day.

2 YEAR
WARRANTY

AUTOMOWER® 310

- Efficient robotic mower for a variety of mid-sized lawns up to 1/4 acre
- Handles slopes up to 45%
- Theft detection pin code and alarm
- Works in rain or shine
- Lift sensor
- Handles narrow passages with ease
- Intuitive menu system allows personal settings to schedule the machine to mow
- Pivoting razor-sharp blades gently cut each grass blade instead of ripping it
- Returns to charging station when needed
- Works with Automower® Connect@Home app
- Includes installation materials

Husqvarna
READY WHEN YOU ARE

HUSQVARNA AUTOMOWER®

HOW IT WORKS!

Automower® cuts a little and often which leads to more efficient mowing and healthier grass. Automower® charges itself automatically and resumes mowing, day in and day out. Plus, with the ability to mow unattended even in wet weather, the perfect lawn is easy to achieve.

UNSURPASSED CUTTING RESULT

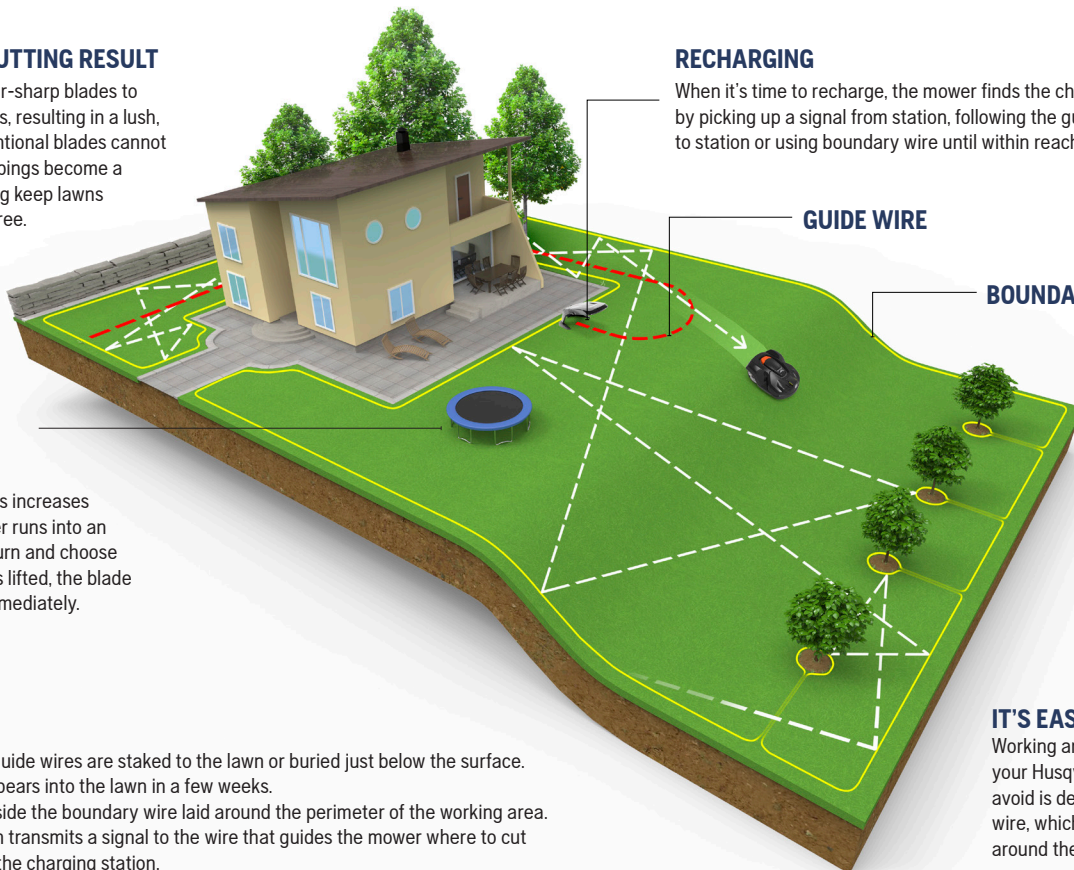

Automower® uses razor-sharp blades to cut every blade of grass, resulting in a lush, green lawn that conventional blades cannot achieve. The grass clippings become a natural fertilizer, helping keep lawns lush, green and weed free.

COLLISION AND LIFT SENSORS

Collision and lift sensors increase safety. When the mower runs into an object, it will reverse, turn and choose another direction. If it is lifted, the blade and mower will stop immediately.

NAVIGATION

- + The boundary and guide wires are staked to the lawn or buried just below the surface. A staked wire disappears into the lawn in a few weeks.
- + The mower stays inside the boundary wire laid around the perimeter of the working area.
- + The charging station transmits a signal to the wire that guides the mower where to cut and also guide it to the charging station.

RECHARGING

When it's time to recharge, the mower finds the charging station by picking up a signal from station, following the guide wire back to station or using boundary wire until within reach of signal.

GUIDE WIRE

BOUNDARY WIRE

IT'S EASY TO SET UP

Working area and areas you want your Husqvarna Automower® to avoid is defined by a boundary wire, which is easily laid out around the desired cutting area.

CONNECT@HOME WITH YOUR SMARTPHONE AND YOU'RE IN CHARGE

Automower® **Connect@Home** is a feature that gives you full control of the mower right from your smartphone. You can send start, stop and park commands, check and adjust the settings, and also receive notifications using Bluetooth technology.

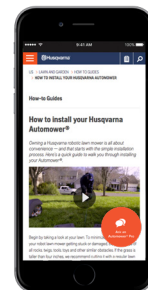

Download App available in Appstore and GooglePlay.
