

California Proposition 65 Statement & Statement of Compliance

Company Name: Liquid Solutions LLC dba StopLossBags

Date: September 10, 2026

Subject: California Proposition 65 (Safe Drinking Water and Toxic Enforcement Act of 1986)
Compliance Statement

1. Statement of Compliance

This statement certifies that the products manufactured, marketed, and distributed by **StopLossBags**—including our food-safe stand-up pouches, plastic fitments, silicone funnels, and MDF filler clips—comply with the regulations established under California Proposition 65 (Safe Drinking Water and Toxic Enforcement Act of 1986).

Based on our formulation reviews, material specifications, and manufacturer certifications, the products listed below do not contain listed chemicals in concentrations that would result in exposure exceeding the California Safe Harbor Levels (No Significant Risk Levels [NSRL] for carcinogens or Maximum Allowable Dose Levels [MADL] for reproductive toxins). Consequently, these products do not require a California Proposition 65 warning label.

2. Material Composition & Assessment Summary

Product Component	Material Composition	Compliance & Safety Basis
Stand-Up Pouches	Our stand-up pouches are manufactured using a proprietary multi-layer polymer film. All components are food-safe and formulated without any chemicals currently	Formulated with food-grade, inert polymers free of phthalates, BPA, and listed heavy metals. Exposure levels fall below Prop 65 Safe Harbor limits.

Product Component	Material Composition	Compliance & Safety Basis
	listed under CA Prop 65.	
Plastic Fitments	Polyethylene (PE)	Manufactured from virgin food-safe polyethylene. Does not leach chemicals on the Proposition 65 list.
Funnels	100% Food-Grade Silicone	High-purity, inert material free of volatile organic compounds (VOCs), lead, and phthalates. Fully compliant with FDA and Prop 65 safety standards.
Filler Clips	Medium Density Fiberboard (MDF)	Manufactured using composite wood compliant with EPA TSCA Title VI and CARB Phase 2 ultra-low formaldehyde emission limits. Finished components pose no chemical exposure hazard during normal use.

3. Statutory Exemption Basis

In addition to material safety compliance, StopLossBags qualifies for exemption under California Health and Safety Code Section 25249.11(b), which explicitly exempts businesses employing fewer than ten (10) employees from the warning requirements of Proposition 65.

Notwithstanding this statutory exemption, StopLossBags remains committed to product safety and environmental responsibility by ensuring all raw materials sourced meet or exceed California Safe Harbor Standards.

4. Use & Handling Advisory

While our MDF filler clips are fully TSCA Title VI / CARB Phase 2 compliant for low formaldehyde emissions, any post-manufacturing modifications that generate dust (such as drilling, sawing, or sanding) may produce wood dust. Under California Proposition 65, wood dust is recognized as a chemical known to cause cancer. Users are advised to operate tools in well-ventilated areas and wear appropriate dust masks during any dust-generating activities.

Certification of Accuracy:

The information provided herein is accurate to the best of StopLossBags' knowledge based on technical data provided by raw material suppliers and current regulatory standards.
