in a 2 quart nursery pot,
in its sleeping beauty stage*

*Dormant plants ship without leaves nor
flowers as it's all about the roots*

About This Variety: Hydrangea Let's Dance Can Do![®], Hydrangea macrophylla x serrata 'SMNHSI' PPAF, CBRAF will be Proven Winners[®] 2023 Flowering Shrub Of The Year. Let's Dance Can Do![®] hydrangea puts on a truly extraordinary performance, even in cold climates. It's not just our strongest re-bloomer, it's also the fastest to re-bloom, providing continuous displays of star-like double flowers through frost. The flower color is a very nice bright silvery-pink; periwinkle -violet when treated with aluminum. Dark Foliage also makes for an excellent cut flower.

Growing Instructions: Select a site that protects your plant from cold, drying winds. The flower color is affected by the amount of aluminum ions in the soil. Acidic soil with aluminum produces blue flowers. Soils with a pH greater than 6.0 produces pink. Dig a hole in humus rich soil. Place roots in soil and cover so the plant sits in 2" of soil Water thoroughly at planting. Do not over water, especially in clay, as this can lead to root rot. Mulch in late fall or early winter. Cover the crown and canes with 8" mulch (chopped and dried leaves). Mulching will ensure your plant with survive winter and provide essential nutrients to the soil.

Care Tip: Hydrangeas grow best if fertilized 1-2 times in summer. You can use organic soil additives such as manure or compost or a chemical fertilizer (10-10-10 works if applied twice during summer). Prune macrophylla varieties in late summer. Prune quercifolia varieties in early spring. Prune Paniculata varieties in late winter to early spring. Prune arborescens varieties to the ground each winter or early spring. Climbing hydrangea can be pruned when needed to maintain.
