Solid Green LED: Device has connected to the Wi-Fi.

2

System Requirements

Wired Connection

Wireless Connection

Please note that the camera is only compatible with **2.4 GHz (802.11 b/g/n)** Wi-Fi network signals.

3

Get the App

Download the free Amaryllo app to get started.

Available on the
App Store

ANDROID APP ON
Google play

Mount Your Camera

Mount the base onto the ceiling and make sure it is tightly secured with the provided screws.

Unlock the
Back Latch

Screw the camera into the mount, then, slide the Back Latch (located on the back of the camera) down with your thumb to allow rotation.

4

Safety Precaution

We designed the camera to be durable and easy to use. Here are some safety guidelines that you should follow:

1. Avoid placing the camera under direct sunlight/rain
2. Only use the provided power adapter and cable for your camera.
3. Never install it in any kind of small box or enclosure, as this can cause overheating.

The operating temperature is **-40° to 140°F (-40° to 60°C)**

5

Free Trial

Follow the instructions on the Amaryllo app to complete the setup.

Try our premium features free for 30 days!

Tip:

You must log in with a Gmail account to activate the continuous video storage that's included in the 30-day trial.

Congratulations!

Biometric Setup Sheet - Activity Map

Understand human behavior with our Heat Map and Path Tracking data analytics.

- ➡ Open Amaryllo App
- ➡ Tap on Activity Map

Heat Map technology analyzes an area over a period of time to calculate which spots are most commonly occupied by people.

The data is displayed with a color gradient, red indicating most visited and blue indicating less visited.

The Heat Map image is updated every hour and data is refreshed by the end of the day.

Path Tracking technology uses picture frame analytics to record recent human activity and compile path data.

The app is then able to display the last ten spots where a human has been detected around your home.

If a thief breaks into your house, you can use these features to see where they lingered the most, as well as their entry and exit points.

Biometric Setup Sheet - AI Recognition

Feel secure with our innovative biometric camera technologies

- ➡ Open Amaryllo App
- ➡ Tap on Settings

Enable Face Recognition

Face Recognition allows your camera to recognize faces and notify you via the App.

Each face recognized by Amaryllo cameras can be blurred in order to comply with CCPA and GDPR requirements.

Add Faces

Amaryllo allows you to save and name up to 10 faces (based on your subscription plan). Once a person is spotted, you will receive a notification.

If you want your Amaryllo camera to learn new faces, tap the label “Add Faces” and follow the instructions.

Enable Other AI Recognition features

Once enabled, you will receive push notifications whenever a Human, Vehicle or Pet is recognized by your Amaryllo camera.
