# ASSEMBLY INSTRUCTIONS

# READ & SAVE INSTALLATION & OPERATION INSTRUCTIONS **TOOLS & MATERIALS REQUIRED**

 Screwdriver • Wire Cutters

· Adjustable Wrench • Wiring Supplies

### **CAUTION**

Prior to assembly, refer to ELECTRICAL CONNECTIONS section. If you do not have electrical wiring experience, refer to a do-it-yourself wiring handbook or have your fixture installed by a qualified licensed electrician.

### **GENERAL**

- Be sure to read these instructions and review the diagrams thoroughly before beginning.
- Electrical connections must be in accordance with local codes, ordinances, or the
- National Electric Code. If you are unfamiliar with methods of installing electrical wiring, secure the services of a qualified licensed electrician.
- Before starting the installation, disconnect the power by turning off the circuit breaker
- or by removing appropriate fuse at fuse box. Turning the power off at the light switch
- is not sufficient to prevent electrical shock.

### UNPACK THE FIXTURE

Check the contents of the wire connector. You should receive:

- Mounting Hardware Package
- · Unassembled Fixture

# PREPARE THE FIXTURE **NOTE:** First turn off electricity.

- 1. If replacing an existing fixture, disconnect and remove old fixture. Expose the supply wiring from wire connector.
- If your fixture is supplied with two machine screws, thread the long machine screws into the opposite side of the anchors. While supporting the fixture, make electrical
- connections.

### FINAL ASSEMBLY

- Spread electrical splices so Black wire are on one side of wire connector and White Wire on the other.
- Install light bulbs (not provided) and cover assembly. Some models employ a twist off top cap to allow access to bulbs.
- 3. CAUTION: Refer to the relamping gtl label located near lamp holder for recommended maximum wattage. Do not exceed recommended wattage.
- 4. Use weather resistant caulk to seal around top and side perimeter of fixture back plate. Leave bottom uncaulked to allow for condensation and evaporation.
- 5. Restore electrical power.
