

WATER THAT'S GOOD

FOR YOUR FAMILY, YOUR HOME AND YOUR PETS

**SALT
FREE**

**ZERO
ELECTRICITY**

**7-STAGE
FILTRATION**

ZERO

MAINTENANCE NEEDED

Features and Benefits

- Prevents hard water scale damage
- Zero wastewater – no drain line required
- Provides pure, clean, alkaline water even in the event of a power outage
- 30-day money back guarantee
- Industry-best 10-year warranty
- Enjoy softer skin and hair
- Components are NSF-Certified
- Fresh, great-tasting, pH-balanced, alkaline drinking water from every faucet in your home
- Ecofriendly
- Recommended for all water heaters, even tankless
- Protects your family from 100s of harmful contaminants

10-Year, All-Inclusive Warranty

King Water Filtration's industry-leading 10-year, all-inclusive warranty covers all hardware and premature system failures. Buy the most trusted brand in water treatment, King Water Filtration.

ALKALINITY CAN VARY BASED UPON REGION AND WATER SOURCE.

WHOLE-HOME

7-STAGE WATER TREATMENT SYSTEM

Removes Contaminants & Prevents Hard Water Scale

**ECOFRIENDLY
TECHNOLOGY**

NO ELECTRICITY

NO SALT

**NO FILTERS
TO CHANGE**

NO MAINTENANCE

**SOFTER SKIN
AND HAIR**

The King Water Filtration Difference

7-Stage, Salt-Free, Filtration and Conditioning System

Stage 1: Bacteriostatic Redox

A natural bacteriostat that removes chlorine, heavy metals (lead, mercury, copper, chromium and other dissolved metals). It also controls scale and algae by preventing the formation of waterborne bacteria and microorganisms.

Stage 2: Kingsorb

This media utilizes a microporous structure to provide a much longer service life than lower grades of media often found in other systems. Kingsorb effectively removes chlorine, chloramines, THMs, PFAS/PFOAs (forever chemicals), volatile organic compounds (VOCs), pharmaceuticals, biological compounds and more.

Stage 3: Zeolite Mineral

Reduces sediment and turbidity down to 30 microns to increase filtration efficiency. It also removes unpleasant tastes and odors.

Stage 4: Anthracite Mineral

An un-activated, carbon-based mineral that is designed to clarify the water by removing suspended particles down to 20 microns and helping to increase service flow.

Stage 5: Garnet Mineral

This dense mineral is a polishing stage that reduces sediment down to 10 microns, ensuring fresh, crystal-clear drinking water.

Stage 6: Quartz Mineral

A coarse mineral that helps to maximize service flow and capacity.

Stage 7: Scale Sequestering Ionizer

This ionizer converts calcium bicarbonate to aragonite, which is a healthy, water-soluble version of calcium that will not adhere to plumbing and fixtures, preventing the damaging effects of hard water scale formation within your plumbing system, fixtures and appliances. Say goodbye to adding salt or performing any kind of maintenance.

1235 Eco-X Series

Tank Size: 12" x 39"

- Treats Up to 3 Bathrooms
- ~750,000-Gallon Capacity
- Service Flow Up to 12 GPM
- 30-Day Money Back Guarantee
- 10-Year, All-Inclusive Warranty

Model: KW-ECOX-1235

1252 Eco-X Series

Tank Size: 12" x 56"

- Treats Up to 5 Bathrooms
- ~1,250,000-Gallon Capacity
- Service Flow Up to 20 GPM
- 30-Day Money Back Guarantee
- 10-Year, All-Inclusive Warranty

Model: KW-ECOX-1252
