net weight of fan: 21.54 lb (9.77 kg)

PRINTED IN CHINA

SAFETY TIPS.

WARNING: To reduce the risk of electrical shock, turn off the electricity to the fan at the main fuse box or circuit panel before you begin the fan installation or before servicing the fan or installing accessories.

1. **READ ALL INSTRUCTIONS AND SAFETY INFORMATION CAREFULLY BEFORE INSTALLING YOUR FAN AND SAVE THESE INSTRUCTIONS.**

CAUTION: To avoid personal injury, the use of gloves may be necessary while handling fan parts with sharp edges.

2. Make sure all electrical connections comply with Local Codes or Ordinances, the National Electrical Code and ANSI/NFPA 70-1999. If you are unfamiliar with electrical wiring or if the house/building wires are different colors than those referred to in the instructions, please use a qualified electrician.
3. Make sure you have a location selected for your fan that allows clear space for the blades to rotate, and at least seven (7) feet (2.13 meters) of clearance between the floor and the fan blade tips. The fan should be mounted so that the tips of the blades are at least thirty (30) inches (76 centimeters) from walls or other upright structures.
4. The outlet box and ceiling support joist used must be securely mounted, and capable of supporting at least 35 pounds (16 kilograms). The outlet box must be supported directly by the building structure. Use only ETL or UL listed outlet boxes marked "FOR FAN SUPPORT."

WARNING: To reduce the risk of fire, electrical shock, or personal injury, mount to the outlet box marked "Acceptable for Fan Support of 15.9 kg (35 lb) or less," and use the mounting screws provided with the outlet box. Most outlet boxes commonly used for the support of lighting fixtures are not acceptable for fan support and may need to be replaced. Consult a qualified electrician if in doubt.

WARNING: To reduce the risk of fire, electrical shock, or personal injury, wire connectors provided with this fan are designed to accept only one 12 gauge house wire and two lead wires from the fan. If your house wire is larger than 12 gauge or there is more than one house wire to connect to the corresponding fan lead wires, consult an electrician for the proper size wire connectors to use.

5. Electrical diagrams are for reference only. Light kits that are not packed with the fan must be ETL or UL listed and marked suitable for use with the model fan you are installing. Switches must be ETL or UL general use switches. Refer to the instructions packaged with the light kits and switches for proper assembly.
6. After installation is complete, check that all connections are absolutely secure.
7. After making electrical connections, spliced conductors should be turned upward and pushed carefully up into the outlet box. The wires should be spread apart with the grounded conductor and the equipment-grounding conductor on opposite sides of the outlet box.

WARNING: To reduce the risk of fire or electrical shock, do not use this fan with any solid state speed control device or control fan speed with a full range dimmer switch. [Using a full range dimmer switch to control fan speed will cause a loud humming noise from fan.]

8. Do not operate the reverse switch until the fan has come to a complete stop.
9. Do not insert anything between the fan blades while they are rotating.

WARNING: To reduce the risk of personal injury, do not bend the blade arms during assembly or after installation. Do not insert objects into the path of the blades.

WARNING: To avoid personal injury or damage to the fan and other items, be cautious when working around or cleaning the fan.

10. Do not use water or detergents when cleaning the fan or fan blades. A dry dust cloth or lightly dampened cloth will be suitable for most cleaning.

WARNING: To reduce the risk of personal injury, use **only** parts provided with this fan. **The use of parts OTHER than those provided with this fan will void the warranty.**

NOTE: The important safety precautions and instructions appearing in the manual are not meant to cover all possible conditions and situations that may occur. It must be understood that common sense and caution are necessary factors in the installation and operation of this fan.

1. Unpacking Your Fan.

Carefully open the packaging. Remove items from Styrofoam inserts. Remove motor housing and place on carpet or Styrofoam to avoid damage to finish. Do not discard fan carton or Styrofoam inserts should this fan need to be returned for repairs. Check against parts inventory that all parts have been included.

2. Parts Inventory.

- a.** canopy. 1 piece
- b.** hanging bracket (pre-attached to canopy). 1 piece
- c.** downrod and hanging ball (with pin and clip). 1 piece
- d.** yoke cover. 1 piece
- e.** remote control transmitter. 1 piece
- f.** motor housing. 1 piece
- g.** remote control receiver. 1 piece
- h.** glass shade. 1 piece
- i.** blade. 5 pieces
- j.** hardware packs

! IMPORTANT REMINDER: You must use the parts provided with this fan for proper installation and safety. **!**

bulb required:
1 x 100 watt max. halogen bulb, type JD E11
(included)

3. Installation Preparation.

To prevent personal injury and damage, ensure that the hanging location allows the blades a clearance of 7 feet (2.13m) from the floor and 30in. (76cm) from any wall or obstruction. This fan is suitable for room sizes up to 400 square feet (37.2 square meters).

This fan can be mounted with a **downrod** on a regular (no-slope) or vaulted ceiling. The hanging length can be extended by purchasing a longer downrod (0.5in./1.27cm diameter). Other installation, such as **flushmount**, is *not* available for this fan.

Installation requires these tools:

Phillips screwdriver, flat-head screwdriver, adjustable pliers or wrench, stepladder, wire cutters and rated electrical tape.

4. Hanging Bracket Installation.

Turn off circuit breakers to current fixture from breaker panel and be sure operating light switch is turned to the OFF position.

WARNING: Failure to disconnect power supply prior to installation may result in serious injury.

Remove existing fixture.

WARNING: When using an existing outlet box, be sure the outlet box is securely attached to the building structure and can support the full weight of the fan. Ensure outlet box is clearly marked "Suitable for Fan Support." If not, it must be replaced with an approved outlet box. Failure to do so can result in serious injury.

CAUTION: Be sure outlet box is grounded properly and that a ground wire (**GREEN** or bare) is present.

Partially loosen screws in slotted holes of canopy. Remove the other 2 screws (along with washers)--save for later use. Twist canopy to remove hanging bracket.

Install hanging bracket to outlet box using original screws, spring washers and flat washers provided with new or original outlet box.* If installing on a vaulted ceiling, face opening of hanging bracket towards high point of ceiling. Arrange electrical wiring around the back of the hanging bracket and away from the bracket opening.

***Note:** It is very important that you use the proper hardware when installing the hanging bracket as this will support the fan.

5. Fan Assembly.

Remove 6 screws and washers from yoke plate (located on top plate on top of motor housing) and set aside. Lift yoke plate and top plate to remove from motor housing and set aside.

Time Saver: Washers for blade screws can be set on each blade screw prior to installing blades.

Locate 15 blade attachment screws and washers in hardware pack. Slide blade through one of the narrow, rectangular openings on center band, aligning holes in blade with holes in blade arm (located **inside** motor housing). Insert 3 blade attachment screws (along with washers) with fingers first and then tighten screws securely with a Phillips screwdriver. Repeat procedure for each remaining blade.

Re-attach top plate and yoke plate to yoke, using washers and screws previously removed. *Be sure that semicircular cutout on top plate and yoke plate aligns over electrical wires for a proper fit. (Also make sure that reverse switch aligns properly with hole for reverse switch in top plate--see drawing.)* Tighten screws to secure top plate and yoke plate.

If you wish to extend the hanging length of your fan, you must remove the hanging ball from downrod provided to use with an extended downrod (sold separately). [If you wish to use the provided downrod, please proceed to instructions on next page.]

To remove the hanging ball, loosen set screw on hanging ball and remove the pin and clip. Lower hanging ball and remove stop pin. Slide hanging ball off of original downrod, A, and slide it down the longer downrod, B (the top of the downrod should be noted as having a set screw hole; use this hole when setting the set screw). Insert stop pin into top of extended downrod and raise hanging ball. Be sure stop pin aligns with slots on the inside of the hanging ball. Tighten set screw securely.

WARNING: Failure to tighten set screw (on hanging ball) completely could result in the fan becoming loose and possibly falling.

["Fan Assembly" continued on next page.]

5. Fan Assembly. (cont.)

Tip: To prepare for threading electrical wires through downrod, apply a small piece of electrical tape to the ends of the electrical wires--this will keep the wires together when threading them through the downrod.

Loosen yoke set screws and nut at top of motor housing. Remove pin and clip from downrod (if you have not already done so). Slide downrod through canopy and then yoke cover.

Thread electrical wires through downrod and pull extra wire slack from the upper end of the downrod.

Place downrod into the motor housing yoke and re-insert pin and clip that were previously removed. Tighten yoke set screws and nut securely. Lower yoke cover to motor housing.

With the hanging bracket secured to the outlet box and able to support the fan, you are now ready to hang your fan. Grab the fan firmly with two hands. Slide downrod through opening in hanging bracket and let hanging ball rest on the hanging bracket. Turn the hanging ball slot until it lines up with the hanging bracket tab.

Tip: Seek the help of another person to hold the stepladder in place and to lift the fan up to you once you are set on the ladder.

WARNING: Failure to align slot in hanging ball with tab in hanging bracket may result in serious injury or death.

NOTE: The important safety precautions and instructions appearing in the manual are not meant to cover all possible conditions and situations that may occur. It must be understood that common sense and caution are necessary factors in the installation and operation of this fan.

6. Wiring.

CAUTION: Be sure outlet box is properly grounded and that a ground wire (**GREEN** or Bare) is present.

Make sure all electrical connections comply with Local Codes or Ordinances and the National Electrical Code. If you are unfamiliar with electrical wiring or if the house/building wires are different colors than those referred to in the diagram to the right, please use a qualified electrician.

When downrod is secured in place on the hanging bracket, wire the receiver with wire connectors provided as shown in diagram at right.

Tip: While you are wiring, keep in mind that wires must not obstruct receiver from sliding into hanging bracket.

* Wrap each wire connector separately with electrical tape as an extra safety measure.

Gently insert receiver (flat side up) into hanging bracket and carefully push taped wire connectors into outlet box. Let antenna rest outside of hanging bracket.

7. Canopy Assembly.

Raise canopy to hanging bracket and align slotted holes in canopy with loosened screws in hanging bracket. Twist canopy to lock. Re-insert screws with washers that were previously removed (page 3, Section 4) and secure all screws with a Phillips screwdriver.

*Remember that antenna for remote control receiver must rest *outside* of hanging bracket.

8. Light Kit Assembly.

Install one 100-watt max. halogen bulb, type JD E11 (included).

Tip: Do not touch glass portion of bulb with fingers or hands. Oil from skin can cause bulb to overheat and go out prematurely. Use cardboard box or foam wrapping bulb was packed with to layer around glass portion of bulb.

Align slots on glass shade with nodules on fitter plate (located on underside of motor housing). Gently push up on glass shade and turn to the RIGHT (clockwise) until it slides completely into place.

IMPORTANT: The glass shade must be removed in order to replace the bulb. When you need to replace the bulb, please allow bulb and glass shade to cool down before touching.

9. Automated Learning Process./ Activating Code.

CAUTION: The remote control transmitter can be programmed to multiple receivers or fans. If this is not desired, turn wall switch off to any other programmable receiver or fan.

Remove battery cover from back side of remote control transmitter.

Install one 9-volt battery (sold separately) in transmitter. **Note:** Leave battery connected but **outside** of battery compartment until learning process is complete.

Note: The dimmer switch (labeled **ON/OFF** and **DIM**) has been pre-set to the "ON" position (**DIM**). If you do not wish to have dimming capability, please move the switch to the "OFF" position (**ON/OFF**).

Restore electrical power. Within 30 seconds of restoring electrical power, press the **LEARN** button, located on right-hand side at top of the battery compartment, for 5 seconds or until fan switches to MEDIUM speed. Test the light and fan functions to confirm the learning process is complete--see Section 11.

Place battery in battery compartment and then replace battery cover on transmitter.

10. Remote Control Operation.

💡 button - Tap once to turn **LIGHT** ON or OFF. Liquid crystal display shows the amount of brightness as a percentage. Holding the button down for more than 2 seconds will cycle light through brightness settings. When turning the light back ON, light will return to the same brightness setting it was on when light was last turned OFF.

🌀 button - cycles through 3 **FAN** SPEEDS and then returns to the OFF setting.

11. Testing Your Fan.

It is recommended that you test fan before finalizing installation. Restore power from circuit box and light switch (if applicable). Test fan speeds with the 🌀 button on the remote control. Test the light ON/OFF function with the 💡 button on the remote control. Test dimmer function by holding down the 💡 button for more than 2 seconds. (For more detailed information on using remote control, see **Section 10** above.)

If the remote control operates all of the functions of the fan and light, battery has been installed correctly. If fan and/or light do (does) not function, please refer to "Troubleshooting" section to solve any issues before contacting Customer Service.

Turn fan completely off *before* moving the reverse switch (located on top of motor housing.) Set reverse switch to recirculate air depending on the season:

- LEFT position in summer (**diagram 1**)
- RIGHT position in winter (**diagram 2**)

A ceiling fan will allow you to raise your thermostat setting in summer and lower your thermostat setting in winter without feeling a difference in your comfort.

Important: Reverse switch must be set either *completely to the LEFT* or *completely to the RIGHT* for fan to function. If the reverse switch is set in the *middle* position (**diagram 3**), fan will not operate.

Troubleshooting.

WARNING: Failure to disconnect power supply prior to troubleshooting any wiring issues may result in serious injury.

Problem: Fan fails to operate.

Solutions:

1. Check wall switch to fan.
2. Verify that reverse switch is set completely in either direction.
3. Verify that receiver is wired properly.
4. Check to be sure fan is wired properly.
5. Verify that wall control is wired properly.
6. Check that red light on remote control transmitter turns on when a button is pressed indicating that the battery is good.
7. Learning process between fan and remote control transmitter may not have been successful and code was not activated. Turn off power, remove battery cover from back of transmitter, and repeat instructions in last 2 paragraphs of Section 9 (page 7).

Problem: Light kit not lighting.

Solutions:

1. Check wall switch to fan.
2. Check that bulb is installed correctly.
3. Check that wires in canopy are wired properly.
4. Learning process between fan and remote control transmitter may not have been successful and code was not activated. Turn off power, remove battery cover from back of transmitter, and repeat instructions in last 2 paragraphs of Section 9 (page 7).

Problem: Fan operates but light fails.

Solutions:

1. Check that bulb is installed correctly.
2. Check that wires in canopy are wired properly.
3. Replace defective bulb with same type of bulb.

Problem: Fan and light fail to operate with remote control.

Solutions:

1. Check battery power to remote control.
2. Learning process between fan and remote control transmitter may not have been successful and code was not activated. Turn off power, remove battery cover from back of transmitter, and repeat instructions in last 2 paragraphs of Section 9 (page 7).

Problem: Lighting source (up-light, down-light or both) not functioning.

Solution:

Wattage Limiting Device has interrupted the flow of electricity to the light source. Ensure bulbs total no more than 190W in the light source.

Problem: Fan wobbles.

Solutions:

1. Use the balancing kit in one of the hardware packs. *If no blade balancing kit is provided, please call Customer Support, 1-800-527-1292, to request one.*
2. Check to be sure set screw(s) on motor housing yoke is (are) tightened securely.
3. Check to be sure set screw on hanging ball is tightened securely.

Warranty.

LITEX LIFETIME LIMITED WARRANTY:

LITEX INDUSTRIES, LTD. warrants this fan to the original household purchaser for indoor use under the following provisions:

1-YEAR WARRANTY: LITEX INDUSTRIES, LTD. will replace or repair any fan which has faulty performance due to a defect in material or workmanship. Contact Customer Service at **1-800-527-1292** to arrange for return of fan. Return fan, shipping prepaid, to Litex Industries, Ltd. We will repair or ship you a replacement fan, and we will pay the return shipping cost.

5-YEAR WARRANTY: LITEX INDUSTRIES, LTD. will repair or replace, at no charge to the original purchaser, any fan motor that fails to operate satisfactorily when failure results from normal use.

RETURN FAN MOTOR ONLY, shipping prepaid, to Litex Industries. We will repair or ship purchaser a replacement motor and Litex will pay the return shipping cost.

6-YEAR to LIFETIME LIMITED WARRANTY: LITEX INDUSTRIES, LTD. will repair the fan, at no charge to the original purchaser for labor only, if the fan motor fails to operate satisfactorily when failure results from normal use. Parts used in the repair will be billed to the purchaser at prevailing prices at time of repair.

The purchaser shall be responsible for all costs incurred in the removal, reinstallation and shipping of the product for repairs.

This warranty does not apply when damage from mechanical, physical, electrical or water abuse results in causing the malfunction. Deterioration of finishes or other parts due to time or exposure to salt air is specifically exempted under this warranty.

Neither Litex Industries nor the manufacturer will assume any liability resulting from improper installation or use of this product. In no case shall the company be liable for any consequential damages for breach of this, or any other warranty expressed or implied whatsoever. This limitation as to consequential damages shall not apply in states where prohibited.

Parts Replacement.

For parts and information, please refer to "Parts Inventory" on page 2.

Litex Customer Support:
1-800-527-1292
