CAUTION

- ☆ Turn off the power of projector and the device before connecting, Either on may cause a break down of machine
- ☆ Check the shape of the plug, DO NOT try the wrong plug

When you use the projector for the first time .It normally will appear image faintness or the image is trapezoid. This is caused by the wrong lens focus or trapezoid correction
Please follow the below steps to correct:

Focus adjustment

- 1、 Rotate the lens into projector, then rotate it out slowly. At the same time, looking at the resolution point carefully. When the image is clear, it is the best situation of the lens

Keystone

- 1、 If a projected picture has keystone distortion, correct image with Keystone adjustment. The image becomes trapezoid shape when the screen or projector is not leveled. Please reposition the projector to improve its angle to the screen. However, the circumference of the image may not be focused

(4)

(5)

Turn on/shut down

If the projector is a new one, please read the “projector install chapter, place the projector and connect the cables, follow the below steps to turn on/off
