

Measurement Guide – GenTent Inverter Kit

- This model can fit fully encased inverter generators with perimeters between 40" – 120".
- Perimeter = (Length x 2) + (Width x 2) (not including handles or wheels)

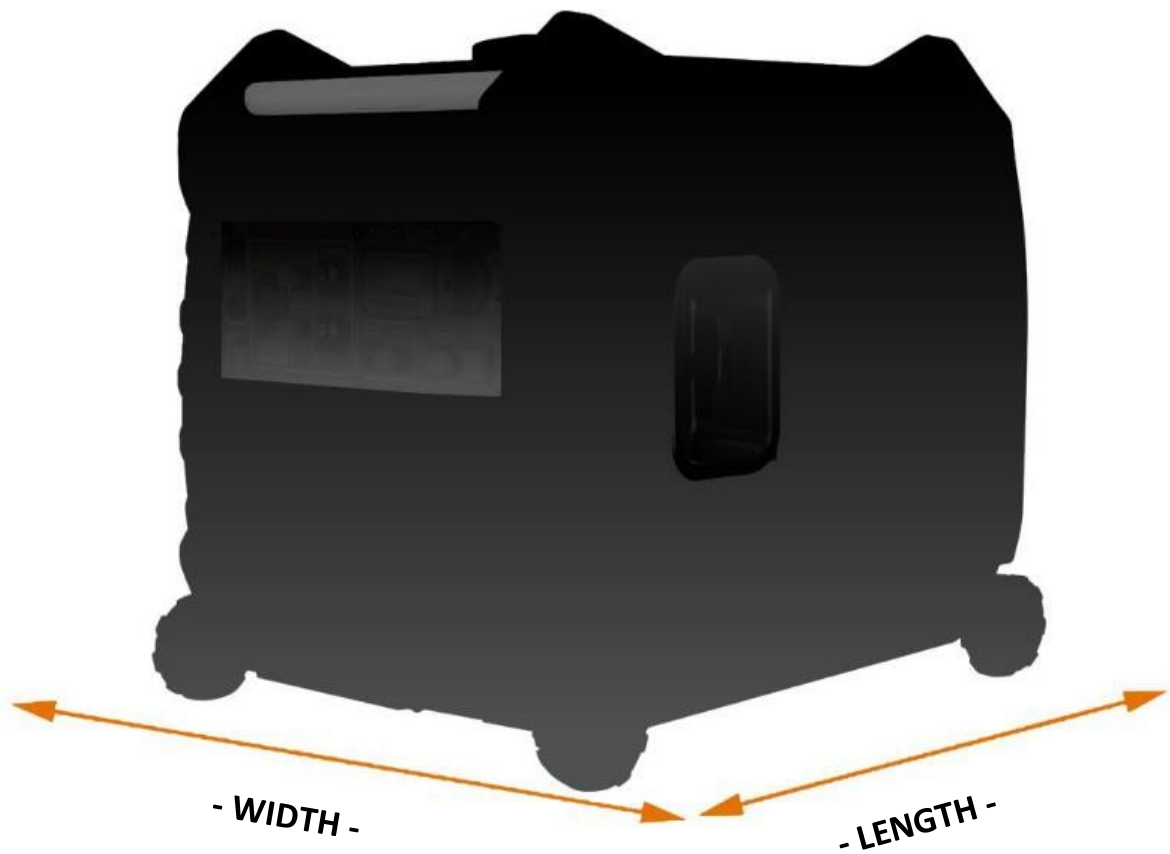

How to measure your fully incased inverter perimeter for a GenTent?

Measure the length of your inverter as well as your width.

Example Inverter: (Length) 23.2" (Width) 17.7"

(Length) $23.2" \times 2 = 46.4"$ (Width) $17.7" \times 2 = 35.4"$

Perimeter total: $46.4" + 35.4" = 81.8"$
