

POOL DECK

Waterborne Acrylic Stain

Provides a durable and attractive walking surface while sealing and protecting from UV and pool chemicals. This self-priming and fast dry coating is a great choice for all types of pool decks as well as indoor and outdoor patios.

CONCRETE POOL DECKS | PATIOS | WALKWAYS

- Bare Concrete (smooth or textured)
- Previously Painted Concrete (when used with Dyco Bonding Primer)

A SINGLE GALLON COVERS ON AVERAGE, 200 - 400 SQFT @ 4 mils wet

Actual coverage rates may vary depending on substrate and application methods. See label for complete details.

HeatDeflect™ Technology helps keep your pool deck cooler by reducing surface heat caused by the sun. Our advanced formula uses a specialized blend of titanium dioxide and calcium carbonate pigments to reflect heat-producing infrared light. While temperature reduction will vary depending on the color chosen, this technology helps reduce heat buildup, making your pool deck more comfortable to walk on, even on the hottest days.

A cost effective way to protect and beautify pool decks, patios, walkways and more!

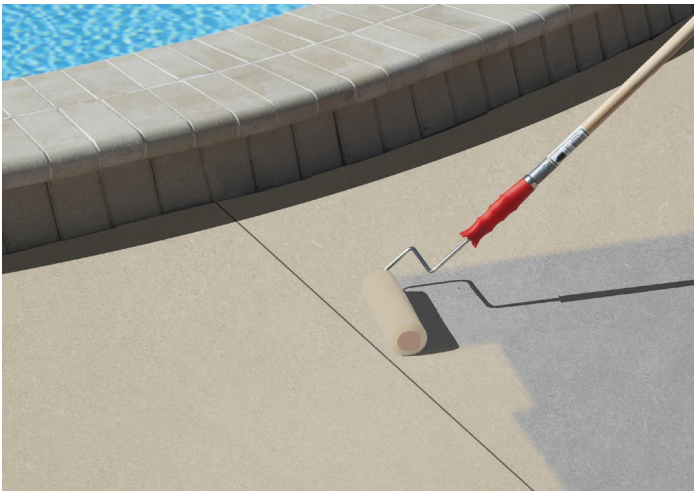

Item #	Name	Size	Color
