Bottom Panel

Step 1.

- Remove blind from package. DO NOT remove the bands and trim guides from the ends.
- Secure the End Leveling Block to a table or workbench using a clamp (not included).
- Place the tilt wand end of the blind into the End Leveling Block

- Lift the pull cord end of the blind and place the Cutting Guide Block under the blind, then lower the blind into the Cutting Guide Block.
- Secure the Cutting Guide Block to a table or workbench using a clamp (not included).
- Make sure that the head rail, slats and bottom rail are all evenly aligned by pushing them toward the End Leveling Block firmly.
- Re-check the accuracy of your Cutting Guide Block to insure proper alignment with the desired trim amount.

- Place your handsaw (not included) into the cutting slot and saw the blind using long, smooth strokes.
- Remove the blind from the blocks.
- If required, repeat the process for the other end.
