

Filtrete™

WHOLE HOUSE AIR FRESHENER

3M

INSTRUCTIONS:

Peel back and discard protective liner.

Fold the plastic blister at the two scored areas to form an inverted "U". For thicker filters or additional support, remove RED liner from Command® Strip and attach to the plastic blister.

Remove BLACK liner from Command® Strip and attach the plastic blister to the filter as shown. The gel will be facing the filter and the plastic blister pack will be facing out.

Please ensure the scented insert is installed facing away from the furnace or air conditioner blower. Larger homes may require more than one scented insert.
