# SAFETY PRECAUTIONS

## !CAUTION!

- Power tools can cause serious damage if not professionally used. Safety gear must be worn before installation to prevent unexpected injuries.
- Pick an area free of hazardous condition before you start on the project. Please use tools and power tools responsibly any loss of control and accident deaths may occur due to abuse of tools.
- Big objects required in this project are needed to be carefully and responsibly moved. Be sure to wear safety gloves and shoes to prevent any serious injury.
- Be extremely careful to not put any parts of your body against a moving part of the hardware. This may cause bruising, punctures, and other results of injuries when for example when fingers are caught in the closing area of the doors.
- Precautions should be taken when opening or closing the door(s). Handles should be used when attempting to slide the door(s). Always keep you and children aware and safe from any unexpected situations.
- Any extreme uncontrolled pressure opening or closing the door(s) can damage the hardware gradually. Use handle(s) to open and close the door(s) with care at all times.

# HARDWARE INCLUDED

Please check that you have the correct quantity of hardware before installation.

Door Design	D	H
Classic	0	0
Single X	2	4
Double X	4	8
Left Arrow	4	0
Right Arrow	4	0

# INSTRUCTIONS

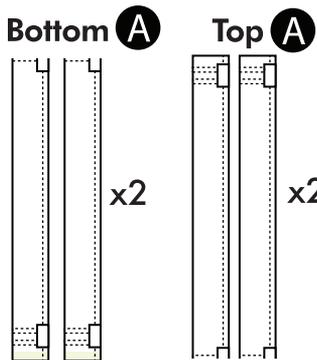

Before assembly confirm two of your A Panels has white foam dowels installed in the grooves like the diagram below. There should be 4 foam dowels in each panel. If you happen to know they are missing please contact us and let us know. These foam dowels are important for the assembly because it helps to minimize the appearance of gaps in between the C panels.

## WHITE FOAM DOWELS

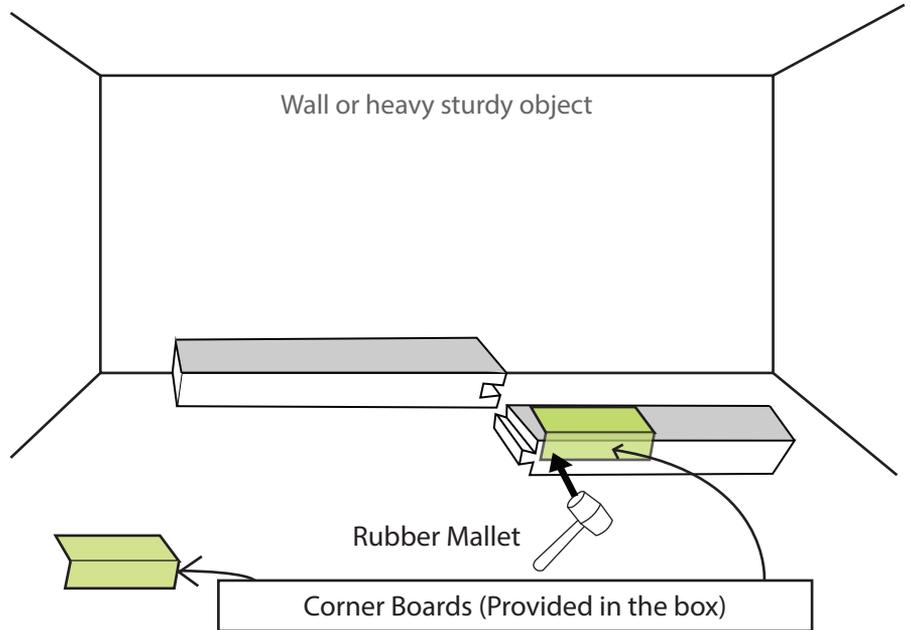

## STEP 1

### Components Needed

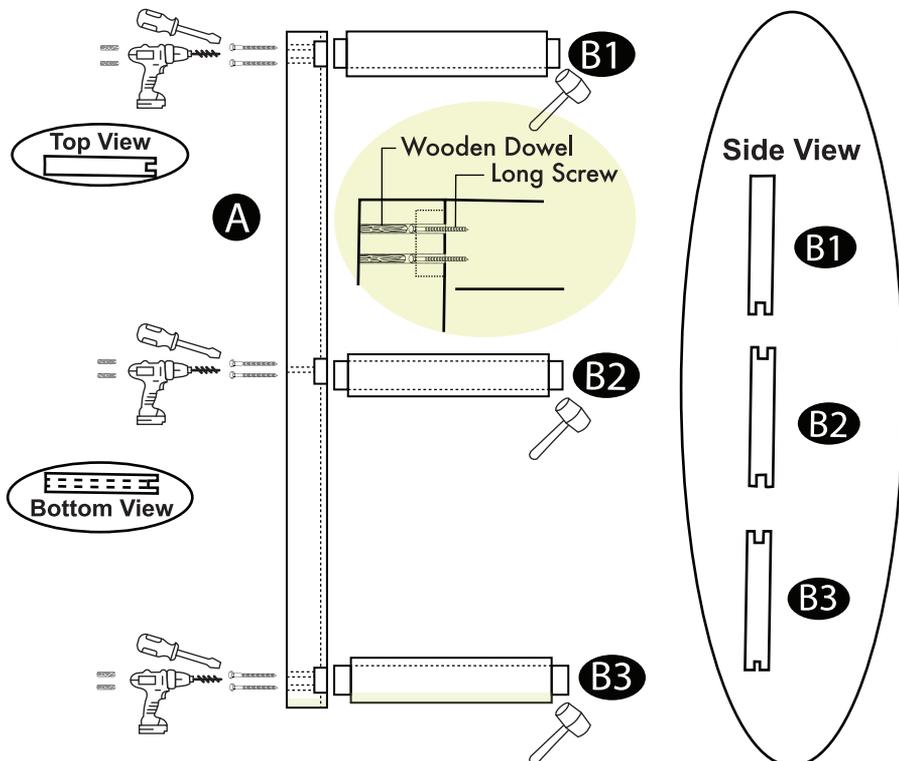

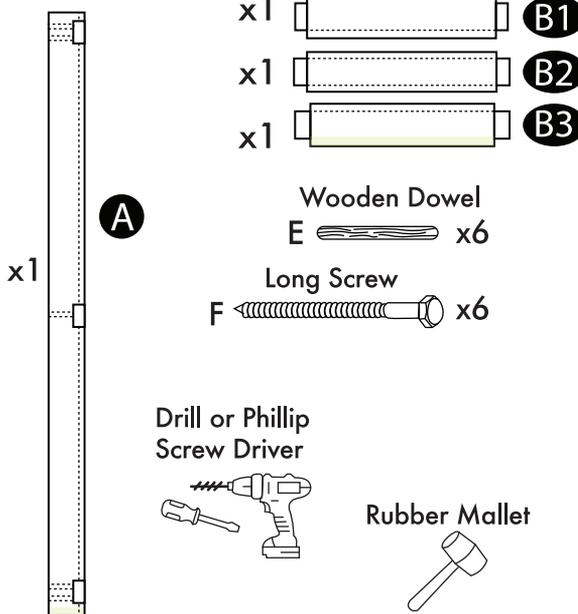

Rubber Mallet

When you are starting with Step 1. Please find a sturdy backing to support the installation of the Top and Bottom A panel. Placing the panels flat on the ground with the non-groove side facing you. With both panels lined up correctly without having it slanted using the corner boards provided in the box to protect the wood from dents, you can start slowly hammering the top panel into the bottom panel until they fit snug and parallel with each other.

## STEP 2

### Components Needed

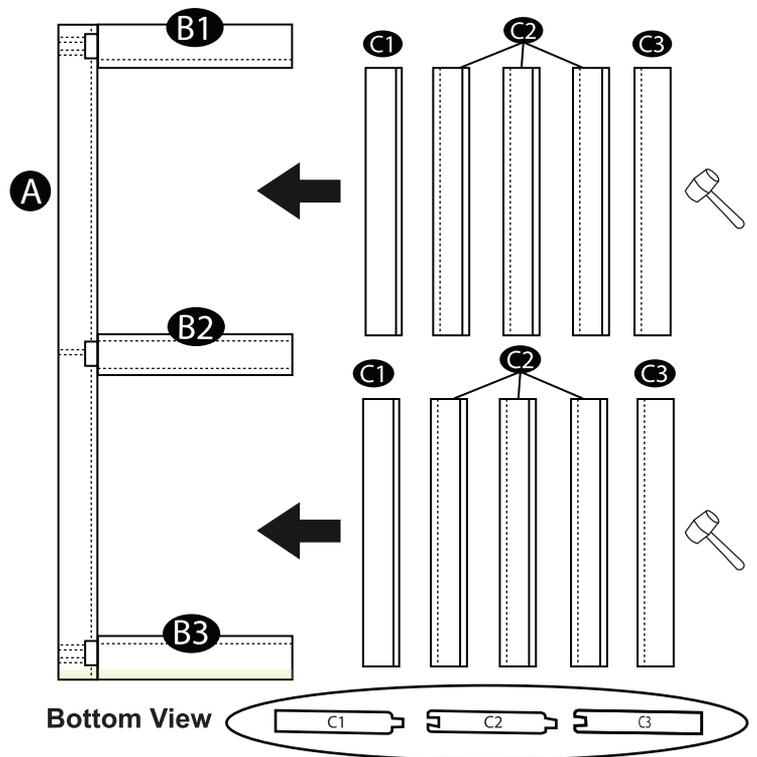

# STEP 3

**Components Needed**

C1 x2    C3 x2    C2

Rubber Mallet

PANEL C2 quantity varies from the size of the doors you have, please go to page 2 for the checklist.

**NOTICE** If the gap between **A** and **B** panels occurs, remove the foam dowels from one of the **A** panels as the expanding foam prevents a tight closure.

# STEP 4

**Components Needed**

Wooden Dowel E x6

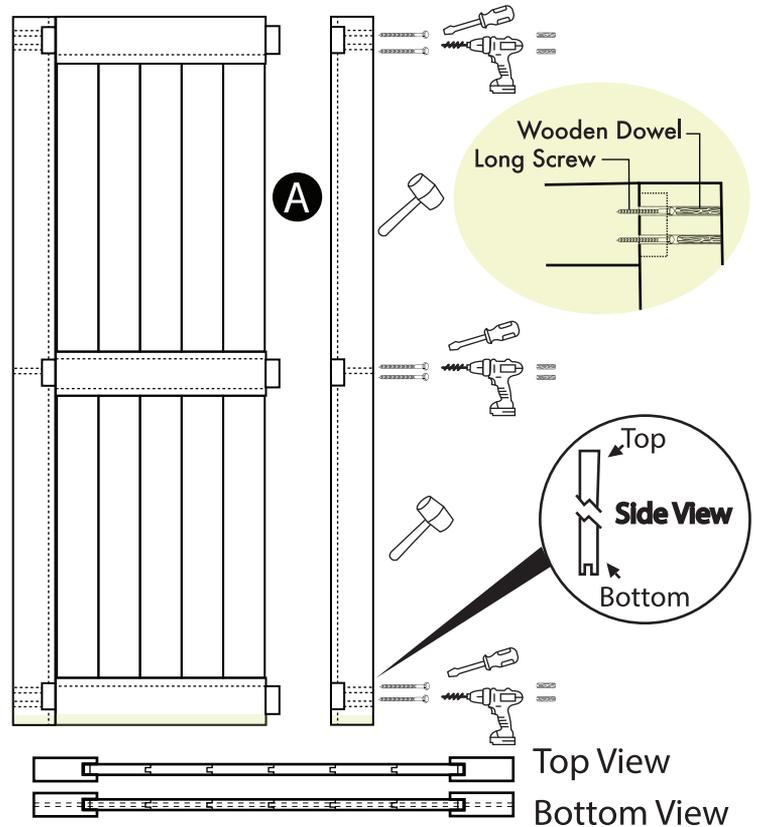

Long Screw F x6

x1

**A**

Drill or Phillip Screw Driver

Rubber Mallet

**ON YOUR OWN PREFERENCE**

Cut down the dowels that is sticking out of the door after installing. Then sand off to smoothen the sides and the whole door to prepare for the finishes needed for your door.

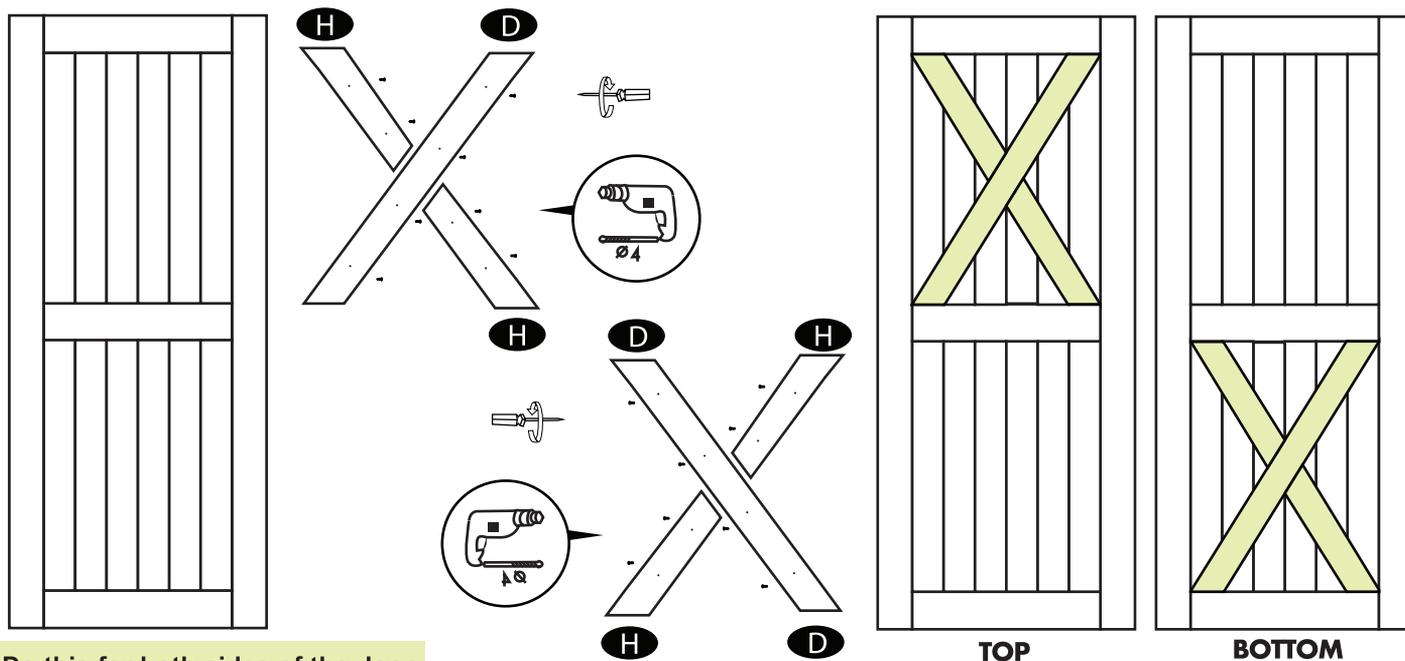

If you order the H design, your installation is complete!

But if you order other designs besides H, please continue to page 5.

Before installing the decorative panels make sure to differentiate the top and the bottom of the door(s). That way you can place the panels, and position it in the desired design.

### Single X Door Design

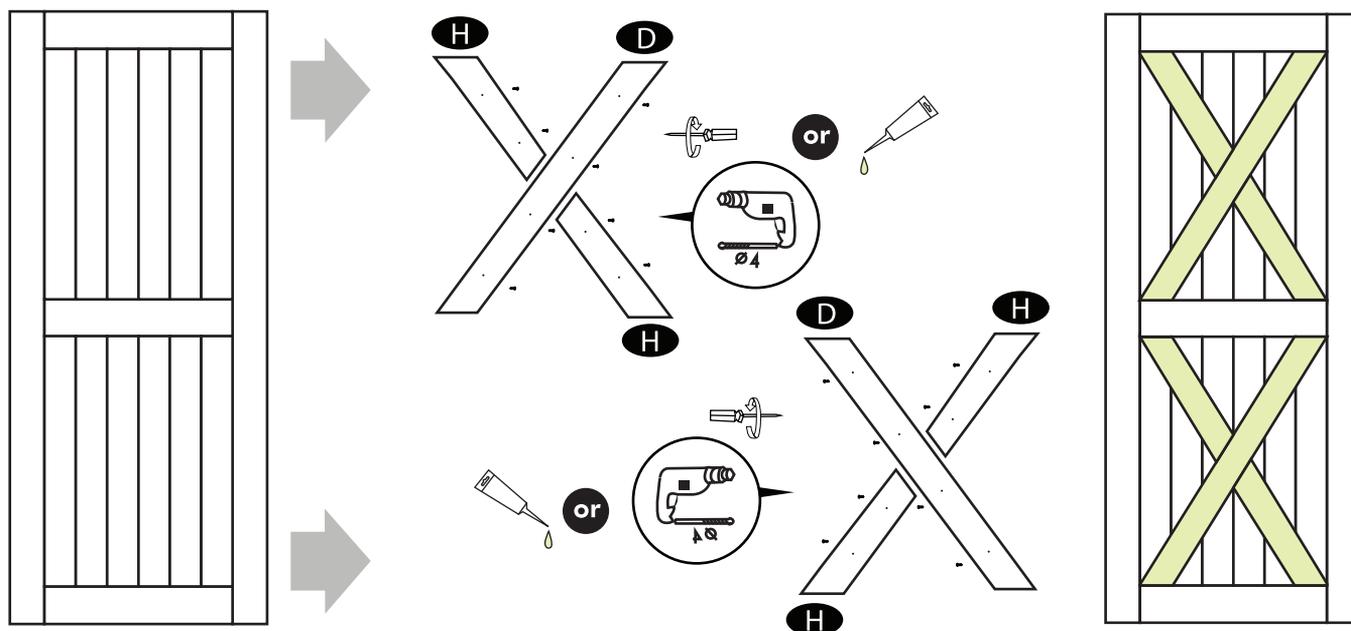

You may follow the diagram below by using the screws included or use your wood glue to get a flawless finish.

Do this for both sides of the door.

### Double X Door Design

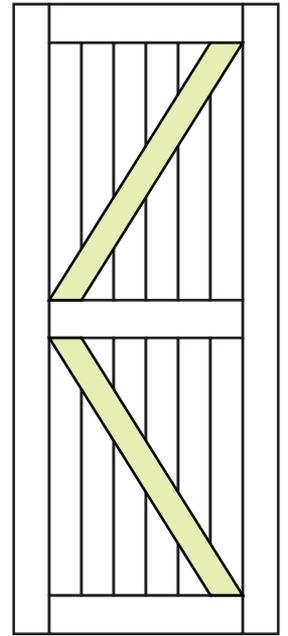

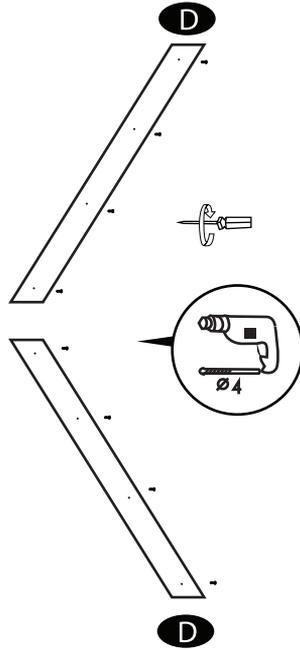

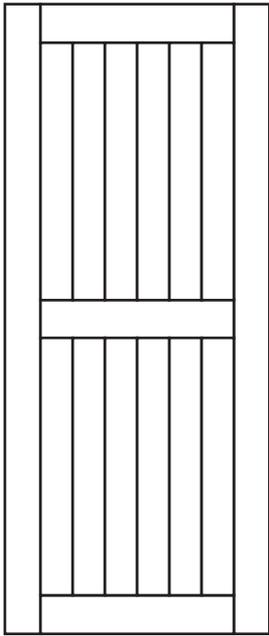

You may follow the diagram below by using the screws included or use your wood glue to get a flawless finish.

Do this for both sides of the door.

## Left Arrow Door Design

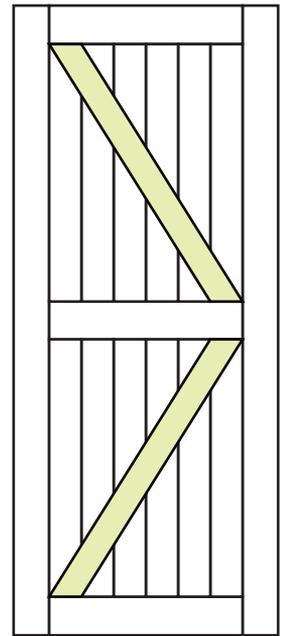

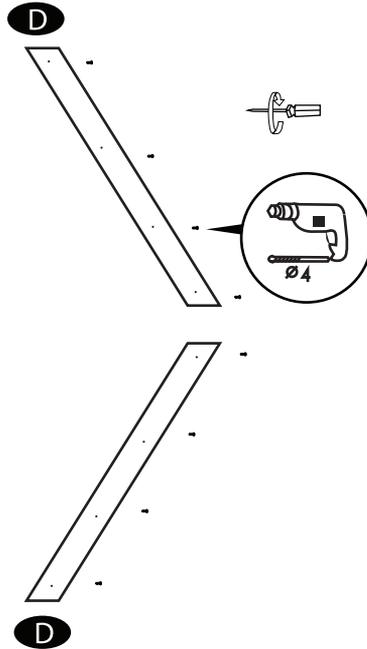

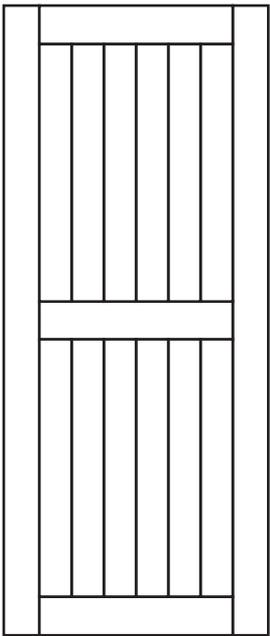

You may follow the diagram below by using the screws included or use your wood glue to get a flawless finish.

Do this for both sides of the door.

## Right Arrow Door Design

You may follow the diagram below by using the screws included or use your wood glue to get a flawless finish.

Do this for both sides of the door.

**YOUR INSTALLATION IS COMPLETE!**
