

Festive Black Trees

Add a little more sparkle to your holiday season with a Festive Tinsel Tree from Fraser Hill Farm. This model will shine in any room it's placed in from the moment you unbox it.

Black tinsel needles populate each branch and reflect light from every angle. String lighting is evenly distributed throughout the tree and provides extra light to the shimmering display.

Metal-hinged branches make it easy to unfold each tier and begin fluffing. These metal branches are extra-durable and designed for many years of bending and folding in and out of storage. A black metal tree stand is included to secure the tree upright.

Enjoy never having to shop, chop, and fuss over another natural tree again. This tinsel tree from Fraser Hill Farm will quickly become the centerpiece of your holiday festivities and will last year after year.
