IMPORTANT - The maximum pitch this cupola will fit is a 9:12 pitch.

1. Cut out one entire side of the box the cupola came in. This will be used for the cutting template.

2. You'll need to trace the outline of your roof.

Center the template onto either the trim or the shingles. Mark the peak of shingles or trim and both lower angles as shown.

If your shed is not yet built you can use the method under step 2a.

- 2a. After assembling the gussets to the rafters, center cardboard template under the peak of two rafters and trace.

3. Use a straight edge to draw connecting lines from peak to both lower angle marks.

4. Cut on lines to make template.

5. Center your template on cupola.

Move template straight up until both angles meet the most lower part of cupola.

6. Once template is centered and in place, trace lines onto the cupola.

Repeat steps 5 & 6 on the opposite side of the cupola.

7. Cut along lines with a hand saw or jig saw.

8. You can locate the cupola over the ridge cap. Or for a closer fit to the roof, you can remove a portion of the ridge cap where your cupola will be installed.

Or only remove the thickness of the cupola sidewalls.

⚠ If you remove some of the ridge cap you need to make sure you reseal this area weather-tight using an exterior rated caulk.

9. Before putting the cupola in place caulk under ONLY the two sides with the cutout angle using an exterior rated caulk. Leaving the other two sides un-caulked allows moisture to escape.

Set the cupola in place and pre-drill $\frac{1}{8}$ " pilot holes on sides approximately 1" up from the lower edges as shown.

Fasten cupola to the roof with the screws provided.

REQUIREMENTS

Storage Buildings & Playhouses

To validate your warranty, it is necessary to properly maintain your Backyard Storage Solutions, LLC unit; shingle the roof and paint or solid-colored stain the siding using 100% acrylic latex exterior product with a minimum of two (2) coats within thirty (30) days of assembly; caulk above all doors and all horizontal and vertical trim boards; paint and seal all exposed edges, sides and faces of SmartSide™ and waferboard siding to include all exterior walls and all sides and all edges of doors.

Gazebos, Pergolas & Timber Buildings

To validate your warranty, it is necessary to properly maintain your Backyard Storage Solutions, LLC unit. This includes treating all of the exposed cedar and pine surfaces on your gazebo or timber building with an exterior grade wood preservative, an exterior oil-based semi-transparent stain, an acrylic latex exterior paint or an acrylic latex solid color exterior stain within 30 days of assembly and as needed thereafter to maintain your warranty.

Keep vegetation trimmed away from building and make sure siding panels and trim do not come in contact with masonry or cement. The minimum ground clearance for siding must be one half inch (½ inch) from concrete slab or two and one half inches (2 ½") from the ground when building is erected or constructed on a treated wood floor kit. Water from sprinklers must be kept off unit. In no event will Backyard Storage Solutions, LLC be responsible for any indirect, incidental, consequential or special damages nor for failure(s) that are caused by events, acts or omissions beyond our control including, but not limited to, misuse or improper assembly, improper maintenance (which eventually leads to rot or decay) and acts of God. Backyard Storage Solutions, LLC will not be held responsible for any labor costs incurred to construct your unit. This warranty gives you certain specific rights that vary from state to state.
