

Ozone Generator Operation Manual

Thank you for choosing our product.
Before using, please read carefully the instructions related to product operation and safety conditions.
Please keep this manual for future reference.

Health and Safety

Warning: Please remember, these machines can only be used in unoccupied spaces!!!

Warning

- ▲Do not use in harsh, flammable, explosive, humid, and other environments.
- ▲Do not cover the air inlets and outlets, and strictly prevent foreign objects from blocking the exhaust.
- ▲Ozone generators are high-pressure products. They should be placed in a safe place and ensure that they are in a fixed state during use.
- ▲When the ozone generator is working, please ensure that there are no people, pets, or living things in the room.
- ▲Ozone has a strong oxidation capability, and the oxidation time should not be too long.
Do not run continuously for more than 6 hours. (We recommend a maximum of 2 hours each time)
- ▲Ozone is very unstable and automatically decomposes into oxygen after an hour, with no pollution and no residue.
- ▲Ozone has a special smell. If you are sensitive to the smell of ozone, please stay away from the device.
- ▲When using an ozone generator, do not expose your eyes directly to the machine's exhaust, to prevent accidents.
- ▲Non-professionals should not disassemble the equipment. If not in use for a long time, the power should be cut off.
- ▲This device is for adult use only and children are not allowed to operate this device.

Repair Regulations

- (1) From the date of your purchase, our company provides after-sales service for the entire product line for a period of one year.
- Our company will not provide you with after-sales service if the product has any of the following defects: Excessive humidity (humidity greater than or equal to 75% or water in the machine causing product damage; product damage is due to unauthorized changes to product structure; product damage is due to natural disasters or other force majeure; product damage is due to long-distance transportation by the shipping company; unable to provide valid proof of purchase.
- (2) You can contact the dealer or our company at any time. Our company will serve you wholeheartedly.
- (3) If there is any ambiguity in the use of the equipment, we will provide you with technical support at any time.

Warranty

One year warranty: If a non-manmade fault occurs within one year from the date of purchase, you can contact us and we will provide you with after-sales service.

The following situations are not suitable for "replacement" and "warranty" services:

- 1.Product damage caused by improper use, malfunction, or force majeure.
- 2.Product damage caused by user disassembling the machine by themselves

Thank You

Thank you for choosing our ozone generator.

Instructions for Use

Step 1 - Clear Contaminants

- Before ozone treatment, please do some cleaning to eliminate the source of the odor.
- Close the doors and windows.

Step 2 - Use Timer

- Plug in the power.

- Set the control knob and then leave the room. Treatment time can be adjusted according to room size and air quality.
 - If you're not sure, start with 15 minutes and increase as needed.
 - The device begins to work, the indicator light is on.
- Step 3 - Unoccupied Spaces Only
- Ensure all occupants and pets stay outside the room during the ozone treatment.
- We include a 'Do Not Enter' sign with each purchase, which can be hung on the door as a warning.
- Step 4 - Ventilate the Room
- When you return to pick up the unit, make sure the timer dial is now in the 'Off' position.
 - Ventilate the treated area for at least 30 minutes before allowing people or pets to reoccupy the space.
 - If you notice any lingering odors, the area might require a longer period of retreatment.

Where to Use

- ☑Homes and Living Areas
- ☑High Pollen Environments
- ☑All Types of Offices and Shops
- ☑Water/Fire Damaged Areas
- ☑Attics and Basements
- ☑New Carpet Furniture and Rooms
- ☑Hotel Rooms
- ☑Cars and Buses
- ☑" Sick" Buildings
- ☑Hospitals and Nursing Homes
- ☑Kitchens
- ☑New Paint and Wallpaper Areas
- ☑Restaurants and Bars
- ☑Day Care Centers
- ☑Smoking Areas
- ☑Doctor's Offices

Troubleshooting

Issue	Recommended Solution
Unit cannot start	Check if the plug is firmly attached, pushed all the way to the side of the machine, and on the wall.
Unit starts, but there is no ozone output	Check if the ozone plate is damaged. If it is damaged, you need to go to a professional repair shop to replace the ozone plate.
Unit temperature is too high	Check the cleanliness and operation of the system cooling fan.

Part of Project	Function
Timer Adjustment Knob	Rotate clockwise to set the timer, recommended timed operation for a maximum of 2 hours.
Indicator Light	Glow s when the unit is running.
Pre-filter	Prevents small particles from entering the generator.

Specifications

Ozone Output	5G/H 10G/H 15G/H 20G/H 25G/H 30G/H 35G/H 40G/H 45G/H 50G/H 55G/H 60G/H 65G/H 70G/H 75G/H 80G/H 85G/H 90G/H		
Rated Power	55W±5W~130W±5W		
Weight	2.2KG		
Cooling Method	Air Cooling		
Outline Size	245x180x210(mm)		
Specifications	US Standard	EU Standard	UK Standard
Power Source	AC110V-135V/60Hz	AC220-240V/50Hz	AC220-240V/50Hz
Applicable Countries	USA, Canada, Japan, Brazil, Mexico, etc.	Germany, France, Spain, Russia, Korea, etc.	UK, UAE, Saudi Arabia, Singapore, Malaysia, etc.

Core Configuration

1. The frame is made of stainless steel, which has features like anti-oxidation, anti-corrosion, heat resistance, wear resistance, etc.
2. Micro-gap ozone generator, high ozone concentration, high voltage resistance, not easy to decompose, and a lifespan of 5-10 years.
3. Wind-cooled energy-saving cooling system, using ball bearing high-speed cooling fan.
