BLEEDING HEART ALBA

Everyone knows this plant, dicentra, which is one of the old fashioned garden plants. It is one of America's favorite plants and timeless classic. They produce flowers which dangle from arching stems. Good combination for hosta and ferns which begin to fill in as the bleeding heart begins to die back.

*tolerates heavy shade*

*timeless classic with  
heart-shaped flowers*

*can be used as a cut flower*

*About This Variety:* This plant is also known as Lamprocapnos spectabilis, has been a common old garden favorite for many years and is native to Japan. Nodding, puffy, heart-shaped, flowers with protruding white inner petals begin bloom in spring before the leaves emerge. Flowers dangle downward at regular intervals beneath long arching stems.

*Growing Instructions:* Performs best in rich moist soils with some shade.

*Care Tip:* Prefers protection from the hot afternoon sun. After flowering cut the plant back to 6" so that the foliage can rejuvenate itself.

*Exposure:* partial shade to full shade

*Height:* grows 24-30" tall

*Spacing:* plant 18-24" apart, 1.5-2" deep

*USDA Zones:* hardy in USDA zones 3-9

Guaranteed to grow 1 year from purchase if directions are followed. Any concerns related to quality and/or counts feel free to contact us.
