Back Flow Prevention Valve

Prevencion de reflujo

This anti-syphon atmospheric vacuum breaker connects to an outdoor faucet and helps prevent water from syphoning backwards.

Convierta fácilmente un aspersor o cabezal con boquilla de PVC de ½" (1.3 cm) en un sistema de riego de bajo volumen colocando goteros o micro aspersores a la salida estriada de ¼" (0.6 cm).

- Prevents syphoning after complete loss of water pressure
- Not for continuous pressure/must be installed after Timer

Install by threading
the Valve onto any
outdoor faucet. Do
not use a wrench or
over tighten.

This Valve prevents water from flowing back into your household pipes if the outgoing water pressure changes suddenly.

Con este convertidor, puede disminuir significativamente el consumo de agua debido a que los microaspersores, los goteros y las tuberías de goteo en línea riegan su jardín más eficazmente.

For outdoor use ONLY
