Smart Deadbolt 2S

Metal grey

The igloohome Smart Deadbolt 2S Metal Grey features a fresh look to the slimmest smart deadbolt in the world. Keeping the sleek and minimalist exterior, it comes with more than enough features to rival the big boys. This is the epitome of style and substance.

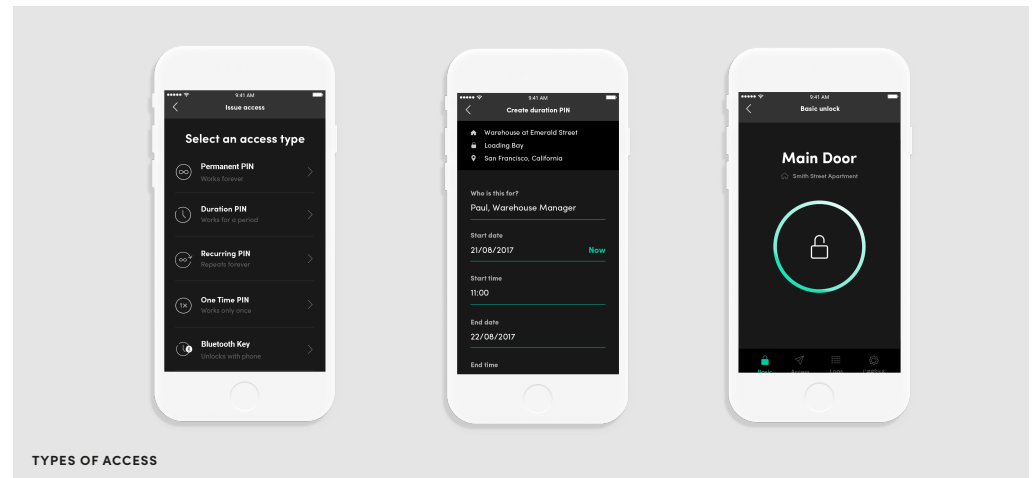

Mobile app-enabled

The Smart Deadbolt 2S Metal Grey works together with the igloohome app to allow home or property owners to grant access remotely via PIN codes and Bluetooth keys.

The property owner can choose to grant permanent, duration, one-time or recurring access for convenience and security. These can be customised for each visitor, ensuring your property is secured before and after the visitor leaves.

PIN code logs and battery status are updated when the lock is synced with the app in Bluetooth range. Bluetooth key unlock logs are updated in real-time remotely.

The app is available for both iOS & Android devices.

Works offline

Even with its remote capabilities, the Deadbolt 2S Metal Grey works offline for enhanced reliability and security. There's no worries of WiFi hacking or network instability.

It features the innovative algoPIN™ technology which makes our security products suitable for properties with weak or no WiFi connections at all. There's no need to download an additional app to receive PIN code access.

SLIM & SLEEK DESIGN

Features

Slim & sleek design

Designed with a universal aesthetic that fits well with most decors, the Smart Deadbolt 2S Metal Grey measures at 11mm thickness for its front panel. The clean and sleek design makes it a stylish addition to any property.

Keypad security lockout

Keypad is disabled after several incorrect PIN code attempts to ensure your property is always secure.

Auto Relock

The Deadbolt automatically relocks once the door is shut to give you a greater peace of mind.

Masking Security Code

Heighten security and throw off onlookers by entering random digits before your actual PIN code.

Tamper alarm

The Deadbolt will sound an alarm if it is being pried from the door to alert and deter potential tampering attempts.

**Note: Alarm is triggered when cable is cut.*

Keypad disabled mode

Disable the keypad to prevent unwanted PIN code entry.

Passage mode

Turn auto relock off via Bluetooth or the Multi-Function Button for easier access if needed.

Volume Control

Adjust the volume according to your preference. Select from levels 0 (mute) to 5 (loudest).

Key override

Physical keys are available as back-up in any unforeseen circumstances.

Airbnb integration

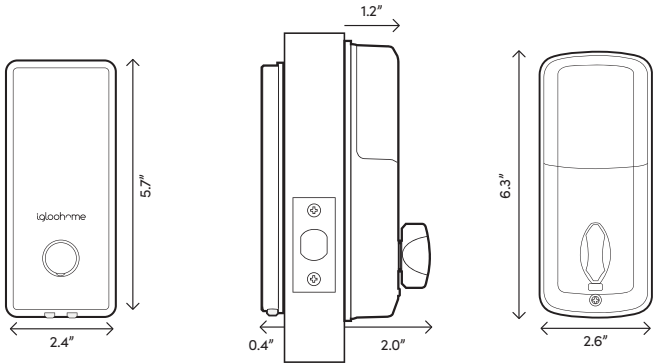

Airbnb hosts can also integrate their calendars with the Smart Deadbolt 2S Metal Grey for automatic generation of PIN codes for guests, with no extra fees.

API & SDK integration

We also provide APIs and SDKs for seamless integration across several platforms.
