

Before committing to buy HAVEN, please use this test to determine if HAVEN will work on your door.

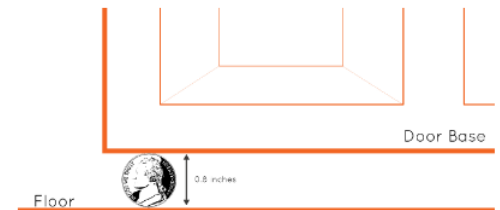

## 1. Your door opens inward.

*Currently HAVEN will only work on doors that open inward, into the home. We do not currently support any doors that open to the exterior.*

## 2. The Nickel Test

*HAVEN is 0.8 inches high and should fit in the clearance path of most modern doors. A standard USD Nickel can be used to gauge the gap perfectly. Take a nickel, stand it on its end and make sure that it can pass under your door.*

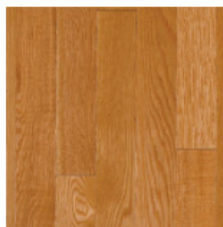

## 3. My floor will work with HAVEN.

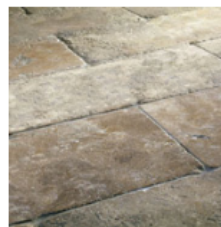

*HAVEN will need to sit firmly on a hard/clean surface: wood, vinyl, linoleum, ceramic tile, concrete or stone are all compatible.*

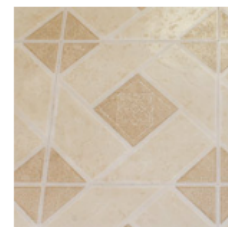

Concrete

Wood

Stone

Vinyl/Linoleum
