

Real wood made to endure.

**WOOD
DECKING**

THE WAY DECKING SHOULD BE...GENUINE, REAL WOOD.

Perennial Wood™ decking is real wood that's been modified to endure with our proprietary TruLast™ Technology, a process that permanently transforms the wood throughout.

PERENNIAL WOOD BENEFITS:

Permanently modified, providing a physical barrier throughout against rot and decay.

Workability and machinability of wood, with standard wood working tools.

Three times more stable than untreated wood, minimizing warping, bowing and cupping.

25-year limited warranty against rot, decay and movement.

25% more surface hardness than raw wood once modified with TruLast Technology.

Harvested and made in the USA.

Perennial Wood decking and railings are available in four factory-finished stain colors.

PERENNIAL WOOD PROVIDES A SUSTAINABLE, LASTING DECK.

- ▶ Harvested from U.S. Southern pine – a renewable resource.
- ▶ Made and manufactured in the USA, eliminating shipping from offshore sources.
- ▶ Lasts longer than unmodified wood, resulting in less material disposal over the long term.
- ▶ Modification process uses heat, pressure and an organic compound, and leaves no toxic substances within the wood.

AVAILABILITY

Perennial Wood decking is distributed in New England through Boston Cedar.

To explore all the available options, sign up for updates or to locate a dealer, visit PerennialWood.com.

TruLast™ Technology has been developed and is backed by Eastman Chemical Company, a Fortune 500 company with more than 80 years of history in acetylating wood pulp. Eastman is actively engaged with Responsible Care® and is committed to continuously improving its sustainability performance through innovative, environmentally and socially responsible solutions.
