

INSTRUCTION GUIDE

BRASS CLEANOUT PLUG

- 1** Ensure threads on cleanout are clean and free of debris.
- 2** Apply an approved Oatey thread sealant to the threads of the Brass Cleanout Plug.
- 3** Screw the Brass Cleanout Plug into the cleanout opening until hand tight.
- 4** Using a pipe wrench or adjustable split ring pliers, finish tightening the Brass Cleanout Plug in place.
- 5** Test to verify that the installation of the Brass Cleanout Plug has created a watertight seal. Run water from the nearest fixture on the same pipe run that the cleanout is located and visually inspect for leaks.
- 6** If a leak occurs repeat steps 1-5 until a watertight seal is achieved.
