

36 in / 91.4 cm

The image shows two vertical medical devices, likely for physical therapy or rehabilitation. Each device consists of a main vertical column with a horizontal arm extending from it. The horizontal arm has a padded cuff at the end, secured with a red strap. The main column has a series of adjustment points, including a spring mechanism and a green button. The devices are mounted on a black base. A dimension line on the left indicates a height of 36 inches (91.4 cm) for the shorter device. A dimension line on the right indicates a height of 50 inches (126.7 cm) for the taller device.
