LIMITED GROWTH & FLOWERING GUARANTEE

Garden State Bulb Co. (GSB) products have been grown with the utmost care and are of excellent quality. In order to obtain the desired end result, it is important that the instructions on our site and/or the accompanying (plant) instructions are followed. Given that we work with a natural product; we offer a 1 Year Limited Growth and Flowering Guarantee.

Garden State Bulb's obligation under this Guarantee is limited to troubleshooting, replacing the product, missing pieces or providing a gift certificate at Garden State Bulb's discretion. All products for which a Guarantee claim is made must be received by GSB and accompanied by sufficient proof of purchase (emailed or original physical store receipt, indicating the date of purchase).

This Guarantee does NOT cover improper handling, storing, weathering, failure to follow directions, improper care, improper maintenance, or acts of nature, (such as damage caused by wind, lightning, snow, water, or ice), or damage caused by improper use of the products are not covered by the product warranty. No other guarantee beyond that specifically set forth above is authorized by Garden State Bulb Co.

HARVEST TIME Summer

LIGHT Full Sun

SPACING 8' apart

DEPTH Plant crown 1" deep

MATURE HEIGHT 4' to 8' tall

BENEFITS Self Pollinating & GMO Free

Soil Preparation

Great gardens start with great soil!
Soil preparation is essential for successful gardening.

Healthy soil should have good tilth, nutrient content, and a viable population of beneficial microorganisms. We recommend using natural and organic ingredients to prepare the soil and maintain soil fertility. It is always a good idea to have a soil test to identify your soil type (sandy, loam, silt, clay) and find out your soil pH.

NOTE: It is important to store correctly until planting. Store in a cool, dry place with plenty of air circulation. Plant in spring as soon as ground has thawed and soil has warmed to 50°F and is workable. Usually 4-6 weeks after the last frost.

Grape Planting Instructions

- 1 Plant grapes in the spring after the ground has thawed and there is no longer danger of frost.
- 2 Choose a location with well-drained soil that receives full sun. Loosen soil prior to planting.
- 3 Remove plant from packaging and lightly loosen the bottom of the root ball to release the roots. Dig a hole in loosened soil as deep as the roots and about twice as wide. Be sure the hole is large enough to encompass the roots without bending them.
- 4 Place plant in hole with the roots down and the crown/top of the roots about 1" below soil surface. Space plants 8' apart in rows 10' apart.
- 5 Cover with soil and water well so that the soil settles. Keep soil moist during periods of dry weather but do not overwater.

* Plants will produce a small amount of fruit after being planted, with more plentiful crops occurring on plants that are 2-4 years old.

* Grapes need a support system and regular pruning to maximize fruit production.

About Grapes

Garden State Bulb Concord Seedless Grape Bare Roots come directly from our farms and growers in the US. They are named after the town in Massachusetts where they were first grown and they've become one of America's most popular grapes. A medium sized, delicious and heart-healthy fruit with loads of antioxidants, they are perfect for eating or making jelly and juices. Concord grapes are one of the easiest grapes to grow, so if you are a gardening novice, these would be good to start with! Please note, it can take 1 to 3 years after planting to reach full maturity size, yielding full production of fruit.
