IMPORTANT SETUP NOTES

- Before plugging in your Wine Cooler, allow it to stand upright for three (3) hours.
- Place only on a flat, level surface that will support the full weight once the wine cooler has been fully loaded. You can ensure the unit is level by placing a small ball on top and checking to make sure it does not roll in any direction.
- Position the cooler in a dry, well-ventilated space with temperatures between 41 °F – 90 °F (5 °C – 32 °C).
- Leave a space of at least 6" in the back of the unit and 10" on both sides.
- Do not use without feet: the unit requires 2" of ground clearance.
- If you are discarding an old unit, remove its door and leave shelves in place to avoid an entrapment hazard.

NOTE: It is normal for your wine cooler to make a whirring sound that will cycle up when the compressor is working harder to chill your wine, and cycle down as the temperature lowers.
