

PARTS LIST:

- *Secure 2 posts from SnapFence Q.U.I.C.K. Kit™ Fence with space for gate between and attach post caps.*
- *Determine how wide you would like your gate and cut two of the rails accordingly. Suggested gate width is 30 to 32 inches. The corner connectors will add 3 1/2 inches to final gate width.*
- *PVC Glue may be used if desired.*

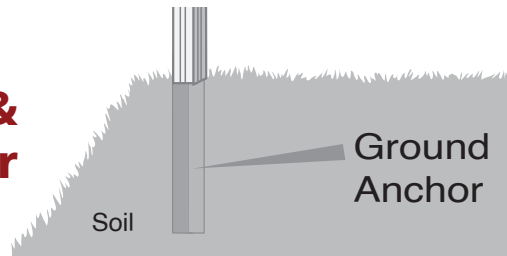

STEP 1. Create Frame

- Attach 4 Corner Pieces to 4 39-7/8" pieces with hole side up on hinge side of gate and 2 Support Brackets.

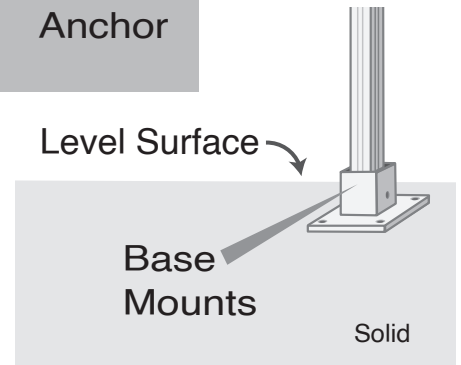

STEP 2.

Install Ground Attachments & 2 Supporting Posts from your SnapFence Q.U.I.C.K. Kit™

- Snap Post Caps on Supporting Posts and slide onto ground attachments.

OR

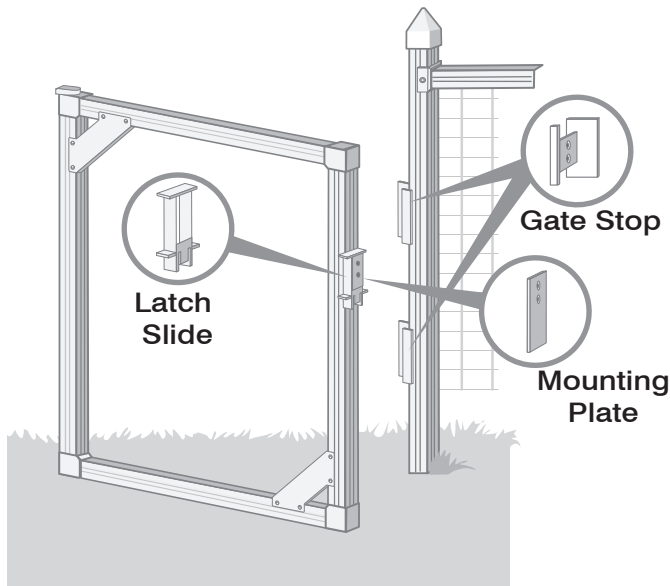

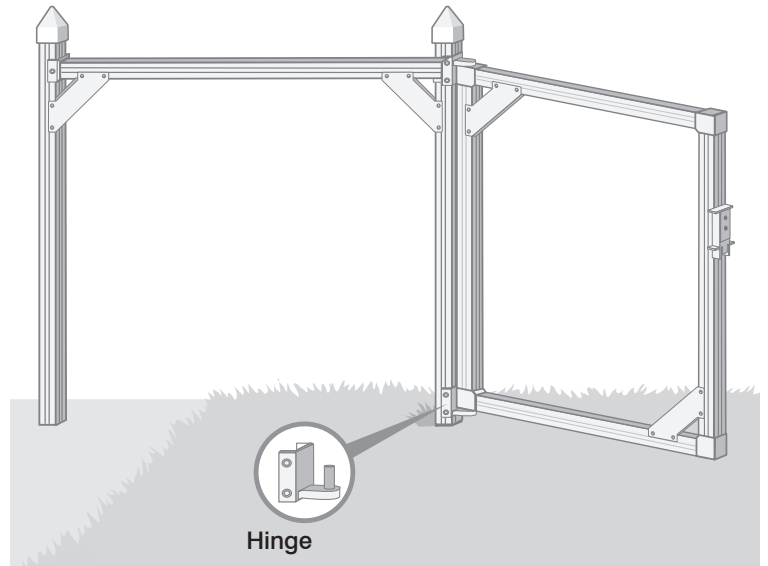

STEP 3.

Add Gate Panels of your choosing (i.e. lattice or wire)

STEP 4.

Install Gate

- Screw bottom Hinge to Supporting Post.
- Slide gate onto bottom Hinge. Insert top Hinge and screw to Supporting Post.
- Extra 2 Support Brackets can be added to adjacent fence panel.

STEP 5.

Install Latch & Gate Stops

- Attach Latch Slide to Rail using Mounting Plate and screw plate in place
- Slide Gate Stop (G) up until it locks with Latch Slide. Add additional Gate Stop where desired.

You're all set to enjoy your **Q.U.I.C.K. Gate Kit™**!
