

INSTALLATION INSTRUCTIONS WARRANTY INFORMATION

FOR SHOWER DOOR AND BATHTUB DOOR

◆ General Information

Inspect the product immediately upon receipt for transit damage, missing packs/parts or manufacturing fault. Damage reported later will not be accepted. Handle the product with care avoiding knocks and shock loading to all sides and edges of the glass.
CKB shower Doors is not responsible for verifying State and local building code.

◆ Notes: Safety glass can not be re-worked

Read these instructions carefully before start of installation.
Special care should be taken when drilling walls to avoid hidden pipes or electrical cables.
Note: This product is heavy and may require two people to install.

◆ Aftercare instructions

After use, your shower should be cleaned with soap and water. This is particularly important in hard water districts where insoluble lime salts maybe deposited and allowed to build up. Cleaners of a gritty or abrasive nature should not be used. Care should be taken to avoid contact with strong chemicals, they can be used but with caution, if in doubt contact the manufacturer of the cleaner in question.
Keep these instructions for aftercare and customer service details.

Note: Aluminium top rail can be trimmed up to 4" for width adjustment. If installation opening is smaller, the overlap of two glass panel is bigger, and the entrance size is reduced accordingly.

INSTALLATION STEPS

STEP 7B

REMARK:

B1. Refer to B1 for install with water deflectors on the bottom of glass panel.

B2. Refer to B2 for install without water deflectors remove 2mm plastic piece and replace with 4mm plastic piece.

WARMLY NOTICE:
Sliding without water deflectors is smoother.
However, there will be a potential water leak.

INSTALLATION STEPS

STEP 8

Carefully slide the door toward the wall and check the door is sliding smoothly.

Adjust if necessary using offset in rollers, so that the sliding door is parallel to the tray.

HOW TO ADJUST

Step 1 : Remove cap from roller

Step 2 : Loosen center bolt with hex wrench

Step 3 : Rotate to adjust panel angle with hex wrench

Step 4 : Tighten center bolt
