DIRECTIONS FOR USE: Remove tube caps and rinse tubes before using. Fill tubes to lines with pool water taken from elbow's depth away from return jets. To adjust pH or raise chlorine or bromine levels, read and follow label directions on appropriate Clorox® Pool&Spa™ products.

Test pH (ideal range 7.2-7.6)

1. Add 5 drops of Phenol Red to pH tube.
2. Replace cap and invert tube several times to mix.
3. Immediately compare water color with color chart to determine pH.

Note: For accurate pH test results, Chlorine must be below 5.0 ppm or for Bromine below 11.0 ppm.

Test Chlorine (ideal range 1-4 ppm) or Bromine (ideal range 2-6 ppm)

1. Add 5 drops of OTO to CL tube.
2. Replace cap and invert tube several times to mix.
3. Immediately compare water color with color chart for Free Chlorine.
4. Wait 5 minutes and compare to color chart for Total Chlorine or Bromine reading.

For Best Results:

- Store in a cool, dry, dark place
- Replace reagents at the beginning of each season
- Compare readings in daylight

NOTE: Keep out of reach of children. Do not dispose of test solution in your pool or spa.

Potential Health Hazard. Read SDS at cloroxpool.com and product label before use.
