15,000 HOURS

WORKS IN
DAMP LOCATIONS

**BATTERY BACKUP
WITH HOOK
7W LED**

The **Simply Conserve® LED 7W A21 Battery Backup Lamp** offers the perfect solution for continuous light during power outages. This unique LED bulb works like a normal light bulb – except it won't turn off when you need it most. It features a built-in battery which recharges while screwed into the light socket. In the event of a power outage, these bulbs will remain on for up to 3.5 hours.

When the power goes out, simply turn on the battery switch to operate the bulb in battery mode. Also included with the bulb is a hook power cap that easily screws onto the bulb, enabling it to be operated like a flashlight. Alternatively, the bulb can be hung anywhere for hands-free light without power. The bulb can also be turned on by touching the top and sides of the metal base with moist hands or a wet cloth.

Providing 600 Lumens of output and featuring a comfortable 2700k bright white color, these bulbs provide light when it's needed most. The standard E26 medium base will fit into any E26 lighting application.

IDEAL FOR:

- Kitchens
- Hallways
- Stairways
- Garages
- Basements
- Bathrooms
- Offices
- Ceiling fixtures
- Lamps
- Camping
- Hiking
- Hurricanes
- Tropical storms
- Emergency kits
