

**SJ-35**  
**3,500 lb.**  
**Sliding Jack**

The SJ-35 Sliding Jack is an affordable sliding bridge jack designed to be mounted on a four post lift's runways. Runway mounting is versatile making this jack great for many brands while maintaining a low profile design. Manual pump operation eliminates the need for air which is perfect for the home enthusiast. The scissor design allows for level, wheels free lifting to make your four post lift complete.

*Stackable Height Extensions  
Included*
