## HERE'S HOW TO TAKE CARE OF ME

## Palm

### LIGHT

I grow best in a bright spot. I prefer at least four hours of bright light per day but no direct sun. The more light you can provide, the healthier I will be.

### WATER

Water me when the top inch of my soil is dry to the touch. Allow water to drain; remove any excess water. I prefer above average humidity levels.

### FOOD

Feed me once or twice a year during Spring and Summer with a fertilizer formulated for houseplants.

### FEATURES

I have upright growth that can purify the air and I am super easy to grow.

### GROWING TIPS

Palms can suffer if the soil stays dry for too long; the tips of the leaves will start to turn brown. Most palms don't like super wet feet and never leave standing water in a drip tray as it can lead to root rot.

### GIVE ME FRIENDS

(I play well with)

Pothos, Monstera,  
Philodendron, Dracaena
