## ALL NEW GREENFIBER

- Bigger bag, less hassle
- For attics and walls
- Breaks up easier

### DENSELY PACKED

Blown-in application fills every gap, void and hard-to-reach place, to better control airflow and reduce sound, heat loss and outdoor allergens.

### SOUND CONTROL

Where air flows, sound follows. SANCTUARY serves as an advanced barrier, that is proven to reduce the power of sound by 60% when installed in exterior walls.

### COMFORT & SAVINGS

SANCTUARY regulates temperatures room-to-room when installed in exterior walls and reduces heating and cooling costs up to 20% when in attics.

### SUSTAINABLE

Greenfiber's manufacturing process keeps 160,000 TONS of paper out of landfills each year, equivalent to 2.72M trees or 14M cu. ft. of landfill space saved.

# WHY INSTALL SANCTUARY BY GREENFIBER?

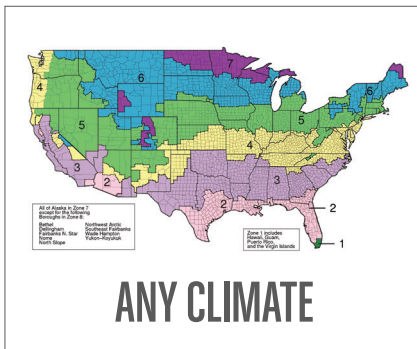

- First all-in-one cellulose insulation is ideal for attics, sidewalls and ceilings, and can be blown-in, dense-packed or spray-applied
- New formulation is suitable for all climates
- Can be installed over existing insulation
- Fits any wall type: 2x4, 2x6 or 2x8
- No-itch formula doesn't require cutting tools; allowing for easy installation in just 3 steps: 1) assemble machine 2) place machine on flat, dry surface 3) point and blow in
- Breaks up easily for consistent coverage
- Covers 48.8 sq. ft per 25 lb. bag at R-19 to reduce jobsite time
- Made with 85% post-consumer paper that uses low energy manufacturing and short haul transportation, resulting in insulation with lower embodied energy
- Limited lifetime warranty

## THE FIRST-EVER 2-IN-1 APPLICATION CELLULOSE

Part # INSSANC

SANCTUARY Cellulose Blow-In or Spray-Applied Insulation 25lbs.

SANCTUARY® is suitable for all climates and conditions. This versatile formulation is designed to perform well in any temperature zone throughout the country.

ZONE	ADD INSULATION TO ATTIC	FLOOR
Uninsulated Attic		
1	R30 to R49	R13
2	R30 to R60	R13 to R19
3	R30 to R60	R19 to R25
4	R38 to R60	R25 to R30
5 to 8	R49 to R60	R25 to R30

## ANY R-VALUE

SANCTUARY® is the first all-in-one cellulose product that can be blown-in, dense-packed or spray applied, allowing you to reach any R-value in attics, and R13–R28 in walls.

Can be easily blown over existing insulation without removing the old, letting you reach the necessary R-value, while reducing energy bills and increasing your R-Value.

Can be blown-into new home attics, or depending upon your climate zone, it works well in cathedral ceilings.

Professional Application:  
Blows into existing walls for reduced noise and fewer drafts;  
Fits any wall type: 2x4, 2x6 or 2x8.

Professional Application:  
Can be dry dense-packed behind netting, or spray-applied into open wall cavities.
