

# WHY BUY

Rialto

Comfortable welded phenolic handles. Side handles oven safe to 428 degrees.

Stainless steel flame guard to protect handle and THERMOPOINT

High heat resistant exterior. Easy to clean and will not stain

Black base improves heat absorption

Heavy gauge forged aluminum body to insure in deformability and withstand corrosion

## PATENEND THERMOPOINT THERMOPOINT

THERMOPOINT is a special feature which changes color when the temperature of the pan changes

Red ideal temperature for cooking

Green ready for touching and cleaning

Keravis 3 coat non-stick coating reinforced with high hardness ceramic and titanium particles

## Cold Forged Technology

Aluminum 99% pure. The purer the aluminum the stronger the coating application. Cast process 86% pure. No blistering and blow hole defects. Differentiated thickness puts thickness where needed. Overall quality is higher in a forged process.
