

*Van Zyverden's*  
**PEONIES MAMMOTH-SIZED ROOTS BLEND**

Peonies are perennials and are known to live for decades, even generations. The blooms are outrageously beautiful, producing lush, glossy green foliage all summer long, turning purplish or gold in the fall, as stately and dignified as any shrub. They are somewhat more expensive to propagate, but well worth the investment in your garden.

**About This Variety:** Van Zyverden produces this special all-in-one mixture - kind of a pot luck, fun and full of surprises. As each mixture is guaranteed to be unique, buy several packs to plant en masse, and create that dramatic, bold, curb appeal. What sets these peony roots apart however from our other peonies are its mammoth sized roots of 3/5 eyes. The best of the best! Starting out with larger root stock from the get go, rewards you with bigger and stronger plants with more flowers sooner. A little more expensive, but why wait?

**Growing Instructions:** In most of the country, the rules for success are simply full sun and well-drained humus-rich soil. Peonies even relish cold winters, because they need chilling for bud formation. In zones 8 and higher they are harder to grow. They are not fussy, but choose your location wisely so that they can be left alone once planted. Plant away from trees or shrubs as peonies do not like to compete for food.

**Care Tip:** The plants require little maintenance as long as they are planted properly and establish themselves; they don't respond well to transplanting. Unlike most perennials, they thrive on benign neglect as they do not need to be dug and divided. Staking may be required. Prune foliage to the ground in the fall.

**Exposure:** Full sun to partial shade

**Height:** Grows 24-36" tall

**Spacing:** Plant 3-4' apart, 1.5-2" deep

**Hardy in:** USDA zones 3-8

Guaranteed to grow 1 year from purchase if directions are followed. Any concerns related to quality and/or counts feel free to contact us.
