

Van Zyverden's
CONEFLOWERS BUMBLE BEE POLLINATOR

Echinacea, which are also known by their common name cone flower, are bright, tall, drought-resistant, and a pollinator's breakfast. Being daisy-like and fragrant, bumble bees, hummingbirds and butterflies flock to them. For years, it was a favorite of the herbal medicine industry and was always one of the greatest wild flowers on the plains. Plant en masse to create curb appeal and help support threatened wild life. Native to the southeastern U.S. and deer resistant.

*Support the bumble bee population
by planting a pollinator*

*Also attracts birds
and butterflies*

Deer and drought tolerant

About This Variety: Echinacea Purpurea, commonly called purple coneflower, produces showy, daisy-like, large, purple flowers that bloom atop strong, stiff stems with broad, dark green leaves. The plant is said to have edible and medicinally uses.

Growing Instructions: Best planted in full sun but choose your location wisely, as they will return for years to come.

Care Tip: Plants usually rebloom without deadheading, however prompt removal of spent flowers improves general appearance. However it will freely self-seed if seed heads are left in place.

Exposure: Full sun

Height: Grows 2-5' tall

Spacing: Plant 2-5' apart, 1.5 -2" deep

Hardy in: USDA zones 3-8

Guaranteed to grow 1 year from purchase if directions are followed. Any concerns related to quality and/or counts feel free to contact us.
