

Application Instruction

1. Gradually pull the handle, it will be more advantageous to protect the cartridge

2. Contrarotate the left handle is for hot water, the greater angle you open, the larger flowrate you get. Conversely the smaller angle you open, the little flowrate you get till turn off. Clockwise rotation the right handle is for cold water, the greater angle you open, the larger flowrate you get. Conversely the smaller angle you open, the little flowrate you get till turn off.

Installation Condition

Notice: In order to have the perfect condition of the water flow, please turn both handles to 30 degree angle slowly so that the air inside the tubes can be clean when you use this product at the 1st time.

Cleaning and maintenance:
Waterfall type: if the water flow weakens slightly after long-term use, the filter screen of the inlet pipe can be cleaned to change this phenomenon. (the filter screen of the water inlet pipe can filter large particle impurities in the water)
