

Installation Guide

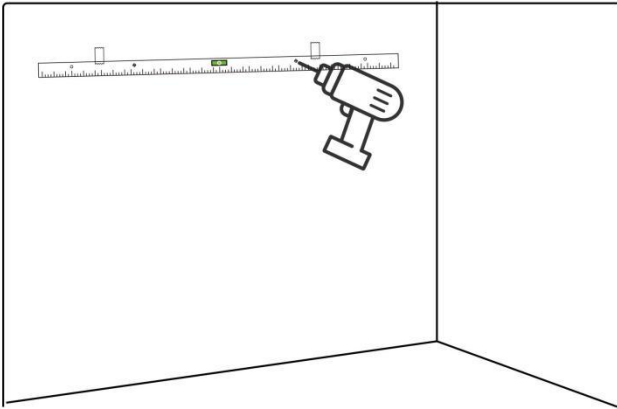

01. Measure the distance between the two hooks with the combination template/level, and mark them.

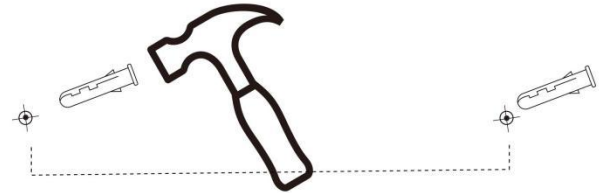

02. Paste the combination template/level on the determined wall, keep the level bead liquid in the middle level to ensure the mirror is level.

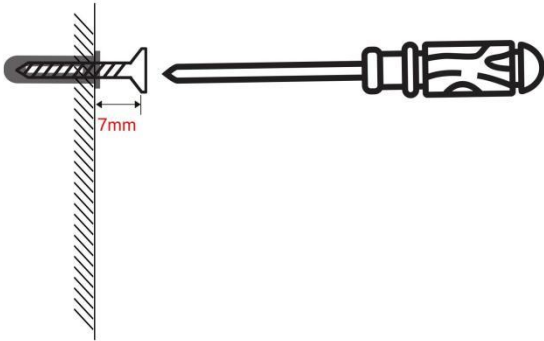

03. Drill holes at the marks with an electric drill.

04. Use a hammer to drive the expansion tube into the hole.

05. Put the screw into the expansion tube with a Phillips screwdriver until the screw head is 7mm off the wall.

06. Mount the mirror on the wall and ensure it is sturdy. Finish!
